

IEEE ENERGY 2030
Global Sustainable Energy Infrastructure

November 17 – 18, 2008
Atlanta Marriott Marquis Hotel
Atlanta, Georgia USA

energy
2030

Depleting fossil fuel resources and climate change are necessitating a move towards a sustainable energy infrastructure. Substantial changes are required as we transition from the current energy infrastructure to a new and as yet unknown future. Will the future be powered by biofuels or by renewable energy such as wind or solar? What role will new smart grid and power electronics technologies play in fostering a sustainable future? Interdependencies between technology, economics and policy need to be understood, if an appropriate roadmap is to be developed.

This new conference provides a forum for the exchange of ideas amongst world renowned experts from a broad range of disciplines on the technology, policy and economic framework required for the creation of a global sustainable energy infrastructure by 2030. The IEEE, as a global technology leader in electrical and related technologies, with 43 societies and 370,000 members, is uniquely positioned to help define what the transformed infrastructure is likely to look like, and to initiate the discussion on the challenges that need to be overcome to achieve success.

The conference will include 125 original papers and presentations on technology, economics and policy issues pertaining to sustainable energy. An industry exhibition featuring world leaders in energy provides a venue to showcase new technologies that will impact energy sustainability over the next 25 years. The conference provides opportunities for interaction with technology, policy and industry leaders.

TOPICS Reduced Carbon Generation, Public Policy for Sustainability, Smart Grid, Energy Efficiency, Demand Management, Plug-In Hybrid Electric Vehicles, Economics of Sustainability, Energy Storage, Power Electronics, Renewable Energy, Distributed Energy Resources

WHO SHOULD ATTEND Energy Industry Executives, Venture Capitalists, Energy Researchers, Government Policy and Research Organizations, Utility and Energy Industry Engineers, Academia, Economists, Consultants, State PUCs.

Please plan to participate in the first IEEE Conference on Global Sustainable Energy Infrastructure – IEEE Energy 2030.

Conference initiated by:

IEEE TA New Technology Directions Committee

IEEE Co-sponsors:

IEEE-USA; IEEE Standards Association; IEEE Industry Applications Society, IEEE Power Electronics Society, and IEEE Power and Energy Society

Confirmed Platinum Sponsors:

Vestas, GE, EPRI, Georgia Tech (SEI, IPIC, SI)

Gold Sponsors:

National Science Foundation, Southern Company ABB, AWEA, UWIG, Innovolt, UTRC

CONTACT INFORMATION

Prof. Deepak Divan and
Thomas Habetler
School of ECE
Georgia Institute of Technology
777 Atlantic Drive NW
Atlanta, GA 30332-0250
energy2030@ieee.org

LOCATION & TIME

Marriott Marquis
265 Peachtree Center Ave. NE
Atlanta, GA 30303
Reservations: 1.866.469.5475
Special Group Rates
Group Code: ieeieea
8:00AM Nov. 17 – 5:00PM Nov. 18
