**Smøla Wind Farm** is a 68 turbine wind farm located in the municipality of Smøla in Møre og Romsdal county, Norway and operated by Statkraft. The farm is located southeast of Dyrnes on the island of Smøla. The farm covers an area of 18 square kilometers (6.9 sq mi).

Total installed capacity is 20 x 2.0 MW (phase one) plus 48 x 2.3 MW (phase two). The maximum production capacity is 150 MW and total generating capacity is in average 450 GWh per year, making Smøla the largest wind farm in the country and the largest onshore wind farm in Europe.
