Papers should make a timely contribution to state-of-the-art technology, be of high technical and editorial quality, and be devoid of commercialism. Each paper proposal must include: technical track number and name, paper title, name(s) of author(s), business affiliation(s), mailing address(es), phone and fax numbers, and e-mail address(es) and corresponding author.

An abstract of **50-100 words** and a digest of 3-5 pages (including figures and tables) stating the objective of the paper, outlining the problem requiring solution or the method of approach to research, being explicit with respect to the type of data to be included in the full paper, and summarizing the conclusions being made. Author may optionally choose to submit a full paper for review.

Technical Forum

Authors who would like to present their work but do not wish to contribute a regular paper may select to do so. The abstract deadline is the same as the regular paper (**50-100 words**). Authors must indicate so during the process of submission of their abstracts.

Research still in early stages and doctoral research proposals can choose to submit their work to this technical forum. A regular paper is not required.
