Mission & Vision of the Beta Eta Chapter

The Beta Eta Chapter of Eta Kappa Nu strives to develop a school students want to learn in, an industry professionals want to work in, and a community people want to live in. This is our mission and we have worked hard during the 2009-2010 academic year to live up to these values of *scholarship*, *professionalism*, and *community service*.

Scholarship Our chapter often works in conjunction with the Electrical and Computer Engineering Department to increase recruitment and retention in our demanding curriculum. Through active participation in departmental activities, peer tutoring, and academic advising.

Professionalism Working closely with industry representatives and career advisors, our chapter has brought its members unprecedented access to opportunities and benefits not available to most engineering students.

Community Service Through engineering outreach programs at local schools to assisting Service Raleigh, we are continually trying to fulfill our obligations to the community as a professional organization. As future leaders in the engineering profession, we will continue to set high expectations of service and commitment.
