Pros & Cons

	Telecom	Internet
PROS	Guaranteed QoS High Security High Dependability	Flexible Bandwidth Low cost
CONS	Fixed Bandwidth High Cost	Best Effort type of QoS Low Security Low Dependability Spams & Malware

Definition & Features of NGN

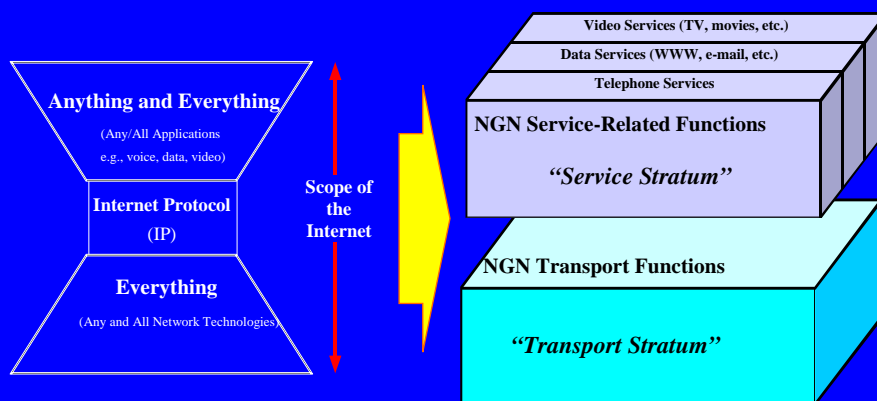

- Packet-based network providing telecommunication services
- Making use of multiple broadband, QoS-enabled transport technologies
- Service-related functions independent from underlying transport-related technologies
- Providing unfettered access for users to networks and to competing service providers and/or services of their choice.
- Supporting generalized mobility, allowing consistent and ubiquitous provision of services to users.

NGN Standardization Release Approach

Services & Capabilities

Koichi Asatani 2008

NGN Release 1 Service Capabilities(1/2)

Service Type	Outline
Multimedia Service	Real-time conversational voice services (interworking with PSTN and cellular networks)
	Real-time text
	Presence and general notification services
	Messaging service
	Push to talk
	Point-to-Point interactive multimedia services (video telephony)
	Collaborative interactive communication services
	Content delivery services
	Push-based services
	Broadcast/multicast services
	Hosted and transit services for enterprises (e.g., IP Centrex)
	Information services (e.g., highway monitoring)
	VPN services
	3GPP release 6 and 3GPP2 release A OSA-based services
PSTN/ISDN Emulation	Same or better PSTN/ISDN service
PSTN/ISDN Simulation	PSTN/ISDN like service

All rights reserved Koichi Asatani 2008

NGN Release 1 Service Capabilities(2/2)

Service Type	Outline
Internet Access	Legacy Internet Access
Other Services	VPN
	Data retrieval (e.g., tele-software)
	Data Communications (e.g., file transfer, Web browsing)
	On-Line applications (e.g., On-line marketing, e-commerce)
	Sensor network service
	Remote Control/tele-action (e.g., Home application control, telemetry, alarming)
	OTN (Over-the-Network) device management
Public Interests	Lawful interception
	Malicious communication identification
	Emergency telecommunication
	User identifier presentation and privacy
	Network or service provider selection
	Support of users with disabilities
	Number portability
	Service unbundling
	Unsolicited bulk telecommunications protection

NTT's NGN Services

Service		Content
Optical Broadband service (FLET'S Hikari Next service)		Service for Residential Users (single family house)
		Service for Residential Users (apartment house)
		Service for Business users
Optical Telephony service (Hikari Denwa and Hikari Denwa Office Type)	QoS Guaranteed	Hikari Telephony (Standard QoS, High QoS: 7kHz)
		Business Telephony
		Video Telephony
VPN service (FLET'S VPN Gate service)	QoS Guaranteed	VPN (Center-to-end, CUG) To be provided
	Best Effort	VPN (Center-to-End, CUG)
Content Delivery Service (FLET'S Cast service)	QoS Guaranteed	Unicast
		Multicast
	Best Effort	Unicast
		Multicast
Ethernet over NGN (Business Ether Wide service)		Ethernet

New Business Models

All rights reserved Koichi Asatani 2008

IPv6 Multi-prefix

HGW: Home Gateway, GW: Gateway, STB: Set top box

All rights reserved Koichi Asatani 2008

Issues

- **Evolution and Convergence**
 - Harmonic FMC
- **New Business Models**
 - Service Creator Involvement
 - NGN as a service platform
- **Regulation**
 - Communication vs. Broadcast
- **Global Standards**
 - Global collaboration
- **Technical Issue**
 - Multi-prefix in IPv6 : Confliction between NGN IPv6 address and ISPs' IPv6 address both of which are assigned to the same terminal.
