## Wireless IT support within hospitals: location-based systems and EMC considerations

Fabrice Labeau  
McGill University 

IEEE VTS NJ Coast Chapter  
April 2010

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

## Outline

- Wireless IT in hospitals
  - Opportunities
  - Challenges
- EMC issues
- Using location information

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 2

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

Part 1:

## WIRELESS IT IN HOSPITALS: OPPORTUNITIES AND CHALLENGES

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 3

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

## Technology to the rescue?

- Medical errors: 40,000-100,000 US deaths/yr
  - 1 in 100 admitted to hospital?
  - Typically *System Errors* (Informational)
- Ex: Medication errors
  - 7-20% of medical errors
  - Huge economic & social impact
    - Costs in the US: \$77B/yr
- Informatics should help minimize Medical Errors
  - computerized order entry or prescribing systems can reduce errors by up to 80%
  - 0.3 hr/hr could be gained for each avoided medication error

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 4

Centre for Advanced Systems & Technologies in Communications

## Wireless?

- Portability, mobility and ubiquity...
- Hospitals and wireless
  - Ban
  - Use in a few areas
  - Use throughout
- Most hospitals want wireless are stuck

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 5

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

## Wireless opportunities

- Portability, mobility and ubiquity...
  - Pervasive IT
- Context awareness
  - IT that knows what the user is doing
  - This entails integration of many components, from sensors to central scheduling databases and patient electronic record.
  - Location is an important part of the context

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 6

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

### Example 1: Automatic patient file

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 7

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

### Example 2: Code blue

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 8

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

### Wireless Healthcare: challenges

- Is it safe?
  - Electromagnetic Interference issues
- Is it reliable?
  - “medical/clinical grade”
- Is it useful?
  - Acceptance issues

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 9

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

Part 2:

### EMC CONSIDERATIONS

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 10

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

### Managing EMI concerns

- EMI & Patient Safety
  - Now: Minimize real-world EMI risk
  - In the future: EMC in multi-source location-aware hospital
- Today: Use known ways to minimize EMI
  1. Educate
  2. Manage wireless sources & medical devices
  3. Ad-hoc test immunity of existing medical equipment

*EMC-Healthcare Taskforce recommendations  
(Proc. 2001 IEEE Int. Symp. EMC: 1308-12)*

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 11

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

### Ad-hoc Testing

- ANSI C63.18 ad-hoc test procedure

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 12

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

## Wireless safety today

- Medical equipment is more immune to EMI
- EMI Malfunctions rare today

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 13

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

## But...

- Hospital must have access to wireless-safety expertise
- Hospital must assess uncontrolled use situations
- Staff education and/or ad-hoc testing required

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 14

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

## Multi-source Safety

- Healthcare tomorrow will employ wireless for pervasive information transmission
- 100s of sources in hospital areas
- standards & EMC recommendations only for one source, in free-space
- New research and guidelines are required
  - for multiple sources
  - in reflective settings

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 15

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

Part 3:

## USING LOCATION INFORMATION

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 16

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

## Using location information

- Location data greatly underutilized
- Asset tracking only first step
- Context-aware computing
- Workflow improvement

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 17

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

## Location awareness

- Location is an important portion of the context:
  - Who/what is where
  - Ex: location-aware routing

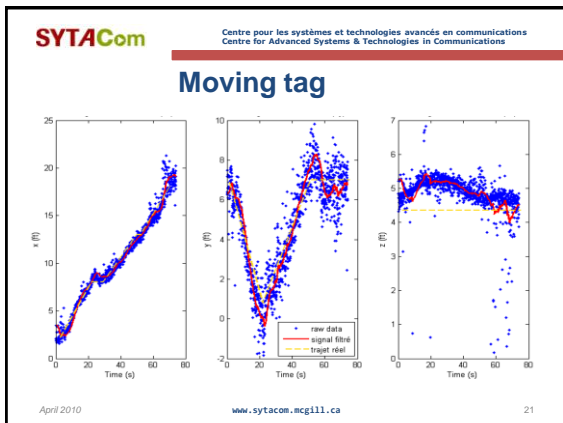

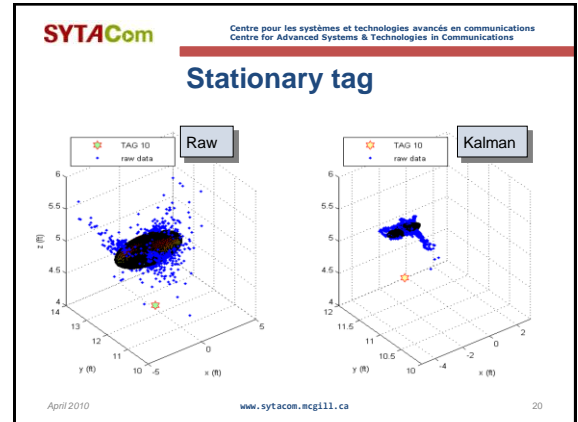

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 18

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

## Location system

- Based on Ultra WideBand technology
  - Precision
  - Low interference
  - Resistance to multipath
- Wearable tags emit pulse regularly
- UWB receivers compute locations based on TDOA
- Post-processing to improve location information

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 19

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

## System Deployment

- Deployment being currently done in ER in Montreal
- Used for
  - development of location-aware systems
  - Workflow monitoring

April 2010 [www.sytacom.mcgill.ca](http://www.sytacom.mcgill.ca) 22

**SYTACom** Centre pour les systèmes et technologies avancés en communications  
Centre for Advanced Systems & Technologies in Communications

## Acknowledgments

- Profs. Bernard Segal, Chris Trueman (McGill/Concordia)
- Bell Canada, Nortel Networks, IBM
- Royal Victoria Hospital (Montreal)
