

Rochester Section of the IEEE Computer Society Presents  
**Agile Software Development Workshop**

Wednesday, November 19, 2003

6:00 - 9:00 PM

Bryant and Stratton, Henrietta Campus, Rm 126, 1225 Jefferson Road, Henrietta, NY.

Michael Donahue will present a workshop introducing the basics of agile software development with hands-on exercise performed in small groups. The primary thrust of this workshop is on the software development activities. Topics presented

- How agile processes differ from rigorous processes
- Values and principles that underlie agile software development
- An overview of three current methodologies that promote agile practices: Feature-Driven Development (FDD), Scrum, and eXtreme Programming (XP)
- Advice on how to apply effective UML-based modeling techniques within agile software projects
- Beginning with a set of requirements, perform release planning and a “barely sufficient” analysis, architecture, and design to enable the implementation of a first iterative release

**Space is limited! Make your reservation by November 17, call the Rochester Engineering Society Reservation Clerk at 254-2350 or email [res@frontiernet.net](mailto:res@frontiernet.net).**
