

Poster Session Instructions

Syracuse Chapter of EMBS Presents:  
The EMBS HealthTech Symposium Fall 2010  
(HealthTech, Fall 2010)

Thursday November 11th 2010 2:30-7:30pm  
At the Welch Allyn Lodge  
4341 State Street Rd, Skaneateles Falls, NY 13153-0220

- 1) all college students are welcome from all universities both undergrads as well as graduates
- 2) the posters are not constrained to any particular size or format, except that each poster will be displayed on a single, free-standing easel (bring your own tape & cardboard)
- 3) if the student plans to present this poster for another venue, it's acceptable to use it "as it" (e.g. the title need not match our conference name)
- 4) it's perfectly acceptable for multiple students to support a single poster
- 5) the poster session is broken up into two segments: one before the speakers and one after. Students are expected to staff their posters for both segments
- 6) high-boy tables will be standing next to the posters during the 2nd segment and students are welcome to eat while staffing their posters (the food is free)
- 7) we will award \$25 for every poster presented to help off-set the cost for materials and travel

Doors open at 2:00 and we ask that every poster be displayed by 2:30 PM and staffed until the speakers start their presentations (around 4:00 PM). During the networking time, we ask that the poster again be displayed and staffed (from 6:00 PM until 7:30 PM). So the students must make a commitment to be available for the entire time of the conference.

The advantage of this poster session is that the audience is friendly, there's no judging and the students have an opportunity to try their material on a receptive audience. To my experience, this is a rare opportunity for students to receive "raw" feed-back to their presentation styles in a non-hostile environment.

Poster positions are limited to 10 and slots will be awarded on a first-come, first-served basis. The deadline is November 4<sup>th</sup>. Anyone interested can use the contact information below for questions or to submit their name, school affiliation (e.g. Cornell University, Molecular Biology Dept.) & poster title for inclusion in the session.

Thanks,

Dan Sommers
