

PaperID	Title
43	A New Method For Real Power Transfer Allocation Using Modified Nodal Equations
45	A Neuro-Fuzzy Approach for Estimation of Time-to-Flashover Characteristic of Polluted Insulators
46	A New Controlling Method Based on Peak Current Mode (PCM) for PFC
49	UPFC Controller Design for Power System Stabilization with Particle-swarm Optimization Algorithm
52	Optimal Harmonic Power Flow by an Ant Colony System-Based Algorithm
53	A SWITCHING LOSS STUDY IN SPWM IGBT INVERTER
55	Computation of Lightning Flashovers & Backflashover Voltage Levels on 230KV Transmission Lines
59	Secondary Voltage Control
61	Artificial Neural Network for Insulator Leakage Currents Prediction from Environmental Data
63	Comparative Study of CoolMOS and MOSFET for High Frequency Circuit Design
64	Performance Study of Line Post Insulator under Different Pollution Conditions
65	Design of an FPGA-based Space Vector PWM Generator for Three-phase Voltage-Sourced Inverters
66	Minimization of Voltage Harmonics and Improving Power Factor beside Balancing Three Phase in asymmetrical circuits
68	EFFECT OF ELECTROMAGNETIC FIELD ON LIVE-LINE WORKERS
70	A Proper Bank Cross-Over Method for Non-Circulating Current Cycloconverter Equipped with Integral Control
71	Simulink Implementation of Digital Cascade Control DC Motor Model - A didactic approach
72	Measurement of Flux Distribution on 100kVA 3phase Distribution Transformer Assembled With 90o T-Joint and Mitred Lap Corner Joint with Stagger Yoke by Using Search Coil
76	Optimal Siting and Sizing of Distributed Generations in Radial and Networked Systems considering Different Voltage Dependent Static Load Models
77	Generation Scheduling Methodology for Thermal Units with Wind Energy System Considering Unexpected Load Deviation
81	A Simplified Approach in Estimating Technical Losses in Distribution Network Based on Load Profile and Feeder Characteristics
82	New Method in Direct torque Control of Permanent Magnet Synchronous Machine
84	Development of Acoustic Emission Diagnostic System for Condition Monitoring of Rotating Machines
85	Cable Life Time/Failure rate Estimation Using Artificial Neural Network
87	ANALYSIS OF BIPOLAR-6-PHASE-TRANSMISSION-SYSTEM WITH OPTION OF 4-PHASE-OPERATION FOR LARGE SCALE OFFSHORE WIND FARMS
88	A PRACTICAL STUDY ON THE DYNAMIC PERFORMANCE OF A CONTROLLER FOR AN ELECTROMAGNETIC LEVITATION SYSTEM.
89	Thermal Unit Commitment Strategy with Solar and Wind Energy Systems Using Genetic Algorithm Operated Particle Swarm Optimization
91	Three Zones adaptive characteristic of the mho distance relay for compensation of the phase to phase fault with fault resistance by KU method
92	USING GA AND OPF FOR SITING AND SIZING OF DISTRIBUTED GENERATION UNITS
93	Effectiveness of Zonal Pricing Congestion Management Scheme in the European Electricity Market
94	DETERMINATION OF PROXIMITY TO STATIC VOLTAGE COLLAPSE USING CPF-GMRES METHOD
95	Evaluation and assessment of transformer failure on 132 kV substation
96	Voltage Stability Analysis of Qatar Power Transmission System Using Singular Value Decomposition Technique
97	Studies on Safe Commutation Strategy in Single-phase Matrix Converter Operating as a direct AC-AC Converter
98	Backflashover Analysis for 132 kV Kuala Krai - Gua Musang Transmission Line
99	Design of Power Oscillation Damping controller for SVC Device
100	Comparing Least Squares Support Vector Machine and Probabilistic Neural Network in Transient Stability Assessment of a Large-Scale Power System
101	Minimum Distance, a quick and simple method of determining the static ATC
102	ASSESSMENT OF VOLTAGE STABILITY WITH NEW NRS
104	Dynamic Simulation of Microturbine Distributed Generators integrated with Multi-Machines Power System Network
105	A New Islanding Detection Method for Distributed Induction Generators
106	Partial Discharge Pattern Recognition of Molded Type Transformers Using Fuzzy C-Means Clustering Approach
107	Single-Phase Shunt Active Power Filter Using Single-switch Incorporating Boost Circuit
108	Single-phase Shunt Active Power Filter Employing Fuzzy Logic Control with Improved Current Tracking
109	Sensorless Control of a BLDC Motor with Back EMF Detection Method using DSPIC
111	Assessment Of Power Composite System Annualized Reliability Indices Based on Improved Particle Swarm Optimization and Comparative Study Between the Behavior of GA and PSO
113	Matrix converter with a new control strategy
114	Thermal Generation Scheduling Strategy Using Binary Clustered Particle Swarm Optimization Algorithm
117	Using Support Vector Machines For Determining Voltage Unstable Areas in Power Systems
118	Ageing of Transmission Line Insulators: The Past, Present and Future
119	Parallel Connection of DC/AC Switched Mode Power Converter in Utility Distribution System
120	Nonlinear Coordinated Control of Multiple HVDC Links
121	NEW DESIGN for ELECTROMAGNETIC ACTUATOR of the VCB and SIMULATION of Its STATIC and DYNAMIC BEHAVIOR
123	Efficient and Adaptive Energy Recycling Load
124	Analysis and Design of Power System Restoration in the Context of Generating Plant Islanding
126	Transient Based Protection Using Current Transients
127	Utilization of LFC Generators with Long Time Delay in Output Power Response
128	Load Modeling Using the Ornstein-Uhlenbeck Process
129	SHORT TERM LOAD FORECASTING USING DATA MINING TECHNIQUE
132	RELIABILITY ASSESSMENT OF DISTRIBUTION SYSTEM WITH DISTRIBUTED GENERATION
133	A Fuzzy Based Control Method for Isolated Power Utility Connected PV-diesel Hybrid System to Reduce Frequency Deviation
134	Optimal Generation Expansion Planning in IPP Presence with HCGA
136	Optimal Distribution Substation Locating Using Improved Genetic Algorithm in Large Distribution Systems
138	Re-engineering the Wind Energy Industry — Challenges, Policy and Technology Development
139	Reduction of Magnetizing Inrush Current in a Delta Connected Transformer
140	Functional Modeling for Intelligent Controller Design for MW-Class Variable Speed Wind Energy Conversion System with Individual Blade Pitch Regulation
142	Operation of Single-phase UPS Circuit Using Single Phase Matrix Converter
143	ANFIS-Based prediction of the MPPT for photovoltaic module
144	Genetic algorithm-trained feed-forward neural network for generating the sizing curve of stand-alone Photovoltaic systems (SAPV)
145	A Novel Commutation Method for Low-Voltage High-Current Input DC-DC Converter
146	Online Fault Detection for Power System Using Wavelet and Probabilistic Neural Network
147	COILGUN ENERGIZED BY COMMERCIAL POWER SUPPLY
148	Optimal Design of Measurement-Type Current Transformer Using Genetic Algorithm
149	Magnetic Levitation Control Based-on Neural Network and Feedback Error Learning Approach
150	Novel Single-Phase Grid-Connected Current-Source PWM Inverter with Harmonic Suppression
151	THE PERFORMANCE OF UNDERGROUND XLPE CABLES BASED ON TAN DELTA AND CAPACITANCE MEASUREMENTS
152	Modeling and Simulation of Overvoltage Surges in Low Voltage Systems
153	The Estimation for Electromechanical Modes of Power System Using ARMA Model Based on The Cross Spectrum
154	Evaluating the Potential of Solenoid Motion System for Electric Vehicle - Challenging the Conventional Usage of Electric Motor
155	Analysis Of Double-Circuit Three-Phase System Versus Six-Phase System For Transmission Line
156	A New Control Method in PV Grid Connected Inverters for Anti-Islanding Protection by Impedance Monitoring
158	Identification of cross-border power flows in integrated networks based on the principle of superposition
159	Coordinated Control of Battery Energy Storage System and Diesel Generator for Isolated Power System Stabilization
161	OPTIMAL LOCATION OF STATIC VAR COMPENSATOR (SVC) BASED ON SMALL SIGNAL STABILITY OF POWER SYSTEM
162	Multipurpose Reconfiguration Of Deregulated Distribution Networks By Using BGA
163	Improvements to Fault Location Analysis Based on Voltage Sag Data - Verifying the Improvements to the Fault Location Accuracy of the Prototype Tool -
164	Study on Various Excitation Effects to the Transient Responses of a
165	Effects of Homogenous Soil Characteristics to the Transient Responses of a Single Long Horizontal Ground
167	Fluorescent Lamp Modeling, Simulation and Analyzing
168	Development of a Dynamical Model for Customer's Gas Turbine Generator in Industrial Power Systems
169	DISSOLVED GAS ANALYSIS (DGA) STUDY OF OVERHEATING FAULT IN BIO-DEGRADABLE OIL INSULATION SYSTEM
174	A New Method for Small Signal Modeling of UPFC
175	Effects of Inverter Modulation Index on the Stability of Grid Connected Micro-Turbines
176	CLASSIFICATION OF CAUSES OF VOLTAGE SAG USING WAVELET TRANSFORM
178	A study to the effect of various burial depths on an SLHGC to the transient responses
179	Dynamic Modeling and Simulation of Solid Oxide Fuel Cell System
180	Comparing the performance of various mother wavelet functions in detecting actual 3-phase voltage sags
181	ANALYSIS OF LOAD FLOW AND SHORT CIRCUIT STUDIES OF AN OFFSHORE PLATFORM USING ERACS SOFTWARE
182	Optimal Location of FACTS devices for damping oscillations
184	Annealing of Metal Wire by Atmospheric Pressure Discharge Plasma
185	Performance Analysis of an Electric Vehicle in Faulty Inverter Mode

186 Reliability and Availability Study on Substation Automation System based on IEC 61850  
187 A Novel Adaptive Power Systems Frequency Estimation Algorithm Based on Complex Artificial Neural Network  
188 Performance Evaluation of Disk MHD Accelerator with Nozzle and Diffuser  
190 Analysis of PQ Waveform for Optimum Data Transmission in IEC 16850 Communication Standard  
191 Scheduling of Demand Side Resources using Binary Particle Swarm Optimization  
192 ELECTRIC POWER SYSTEM'S DYNAMIC VOLTAGE STABILITY IMPROVEMENT THROUGH A THYRISTOR CONTROLLED SERIES COMPENSATION STRATEGY  
193 Investigation of Electromagnetic Interference Effect from Power Line Noise in ECG Signal using Faraday Cage  
194 Lab prototype Dynamic Voltage Restorer  
196 Better Performance Pulsed Launcher System by Adjusting Projectile Initial Position  
197 Dynamic Analysis of three phase Z-source Boost-Buck Rectifier  
198 State-of-Charge Estimation for Lead-Acid Batteries Based on Dynamic Open-Circuit-Voltage  
199 Improved Current Control Strategy for SAFF  
200 Electromagnetic Interference Analysis for GSM Tower under The Influence of Lightning Over voltage.  
202 Damping of Inter Area Oscillations Using Interline Power Flow Controller Based Damping Controllers  
206 Single-Phase Single-Switch Boost PFC Regulator with Low Total Harmonic Distortion and Feedforward Input Voltage  
207 Optimal Vector Control of Permanent Magnet Synchronous Motor  
208 A High-Performance Vector-Controlled PMSM Drive with Maximum Torque per Ampere Operation  
210 A New Adaptive Hybrid Neural Network and Fuzzy Logic Based Fault Classification Approach for Transmission Lines Protection  
212 An Approach for Improving Spinning Reserve Capacity by Means of Optimal Utilization of DR Program  
213 FPGA Design of Single-phase Matrix Converter Operating as a Frequency Changer  
215 The Investigation of PD pulse propagation characteristics on XLPE cables  
216 ANN-Based Detection of Broken Coils of Small Generator Stator with Two Parallel Branches in Phase  
219 Tenaga Nasional Berhad Wide Area Measurement System Based Applications  
221 Newton-Raphson Power Flow Solution Employing Systematically Constructed Jacobian Matrix  
222 Wavelet Transform For Determining The Causes Of Transient  
223 Performance of Restricted Earth Fault Protection Scheme in the Presence of Current Transformer Remanence  
224 TAGUCHI'S METHOD FOR OPTIMIZED NEURAL NETWORK BASED AUTORECLOSURE IN EXTRA HIGH VOLTAGE LINES  
229 BALANCED DRIVING SYSTEM FOR MULTIPLE COLD-CATHODE FLUORESCENT LAMPS  
230 Control of Hopf Bifurcation and Chaos as Applied to Multimachine System  
231 A Novel Single-Stage High-Power-Factor High-Efficiency AC-to-DC Resonant Converter  
232 Multi-Agent Particle Swarm Optimization Approach for Optimal PSS Designing in Multi-Machine Power Systems  
233 Sensitivity Analysis of TRV in TCSC Compensated Transmission Lines during Fault Clearing by Line CB  
235 Short Term Load Forecasting by Using Neural Network Structure  
236 Time Domain Approach Compared with Direct Method of Lyapunov for Transient Stability Analysis of Controlled Power System  
237 Intelligent System for Detection of Fraud Electricity Cases of Ordinary Power Consumers using Support Vector Machines  
239 A PLC-based Self-tuning PI-Fuzzy Controller for Linear and Non-linear Drives Control  
240 A Control Strategy for the Grid-connected PV System Using a Z-Source Inverter  
242 A Novel Approach for Modeling Wind Turbine Generator for Reliability Analysis  
243 The influence of semi-conducting layers and lossy insulation on the attenuation behavior of power cables  
244 Environmental Benefits through New Distributed on Site Control Actions inside European Apartments  
245 Fuzzy Control of DFIG Wind Turbine to Enhance Islanding and Micro-Grid Autonomous Operation of Micro-Grid  
248 Fuzzy Mid Term Unit Commitment Considering Large Scale Wind Farms  
249 Allocation of Loss Cost by Optimal and Proportional Tracing Methods  
253 Power Quality Indexes for Continue and Discrete Disturbances in a Distribution Area  
254 Numerical Simulation for Hypersonic Vehicle On-board Magnetohydrodynamic Power Generation  
255 Newton-Raphson on Power Flow Algorithm and Broyden Method in the Distribution System  
256 Newton-Downhill Algorithm for Distribution Power Flow Analysis  
257 A Chance-Constrained Programming based Approach to Optimal Hydro Energy Allocation  
258 Next-Day Peak Electricity Price Forecasting Using NN Based on Rough Sets Theory  
259 Genetic Algorithm Application to Corona Inception Voltage Estimation in High Voltage Technique  
260 A Minimal-order Observer based Coordinated Control Method for Isolated Power Utility Connected Multiple PV Systems to Reduce Frequency Deviations.  
261 Transformerless DC Power Supply using Series Resonant, Parallel Loaded, DC-DC Converter  
262 Permanent Magnet Brushless Machines with Minimum Difference in Slot and Pole Numbers  
263 Studies on Control Electronics Implementation of Single-Phase Matrix Converter Operating as AC-DC Converter with Active Power Filter Function  
264 Investigation on the Effect of Shunt Capacitor and Shunt Filter on Harmonic in Distribution System  
265 Single Phase Matrix Converter For Inverter Operation Controlled Using Xilinx FPGA  
266 Variable High Frequency Voltage Source for an Ohmic Heating Process  
267 Non-linear modeling of transformer using Hammerstein model  
268 Reactive Power Procurement Scheme For Use In Competitive Power Markets  
269 A Frequency Control Approach by Decentralized Generators and Loads in Power Systems  
270 A Comparison amongst Sub-Optimal Ordering Schemes for Power Systems  
271 Development of Mathematical Equation for Determining Breakdown Voltage of Electrodes Gap  
273 A New Control Methodology of Wind Farm using Short-Term Ahead Wind Speed Prediction for Load Frequency Control of Power System  
275 Boost Rectifier Using Single-Phase Matrix Converter with Bipolar Output  
277 Coordinated Control of Once-Through Power Plant Based on Feedback-Feedforward Fuzzy Control  
278 A Novel Approach for a Z-Matrix Building Process Using Genetic Algorithm.doc  
279 Reliability Enhancement of Deregulated Power Systems Using Transmission Lines Pricing and Optimum Power Distribution.doc  
281 On-grid and Off-grid Operation of Multi-Input Single-Output DC/DC Converter based Fuel Cell Generation System  
283 A NN based Control Algorithm for 3-Phase 3-Wire Hybrid Active Power Filter under non-ideal Mains Voltages  
284 Sugeno-type Fuzzy Logic Controller (SFLC) for a Modular Structured Multilevel Inverter (MSMI)  
285 Consideration on Electrical and Mechanical Time Constants for Linear Oscillatory Actuator Design  
286 Design and Analysis of Permanent Magnet Generator  
287 Effect of Antenna Position of Transformer Winding Axial Displacement Measurement Using Electromagnetic Waves  
288 A new topology-reversing voltage (RV)- for multi level inverters  
289 Power Quality and Electromagnetic Compatability -the Ubiquitous Power Supply Input Stage-  
290 A Modeling of Self Excited Induction Generators Driven by Compressed Air Energy Based on Field Oriented Control Principle  
291 A NOVEL DC-DC SWITCHING CONTROL  
296 A Sensor Fault Tolerant Drive for Interior Permanent-Magnet Synchronous Motors  
297 An Extended Dynamic Matrix Control Design for Quasi-Resonant Converters  
298 A Study on Static Voltage Collapse Proximity Indicators  
299 Improvement of Input Side Currents of a Three Phase Rectifier Using Cúk Converter in Discontinuous-Capacitor-Voltage Mode Operation  
301 A Risk-Based Approach for Provision of Spinning Reserve by Means of Emergency Demand Response Program  
302 Effects of Voltage Transformers Connection Point on Measured Impedance at Relaying Point for Inter Phase Faults in Presence of TCSC  
303 PWM Inverter Regulation Using Single Input Fuzzy Logic Controller  
304 A Review on Controllers for PWM Inverters  
305 Optimal Control of Voltage in Distribution Systems by Voltage Control Reference Management  
306 A study for Decentralized Voltage Control in the Distribution System Using Neural Network  
307 Electromagnetic Interference Analysis of GSM Tower under the Influence of Lightning Over-voltage  
308 Analysis of Three Phase Distribution Networks with Distributed Generation  
309 Performance Improvements of IPMSM Position Sensorless Control for Low-speed Operation using epsilon 1 Modification Approach  
312 Supervisory Control and Data Acquisition System (SCADA) Based Customized Remote Terminal Unit (RTU) for Distribution Automation System  
313 Customized Fault Management System for Low Distribution Automation System  
314 Power Line Carrier (PLC) Based Communication System for Distribution Automation System  
317 COST OF THE ELECTRICAL ENERGY OBTAINED BY COGENERATION IN THE SUGAR CANE MILLS. PART II. APPLICATIONS.  
318 COST OF THE ELECTRICAL ENERGY OBTAINED BY COGENERATION IN THE SUGAR CANE MILLS. PART I. BASIC CONCEPTS.  
320 Transmission Loss Allocation: A Comparison of Different Proposed Methods  
321 The Effect of Different Winding Techniques on the Stray Capacitances of High Frequency Transformers Used in Flyback Converters  
322 Synchronous Machine Drive Observability Analysis and Sensorless Control Design  
323 IMPLEMENTATION AND USE OF LIGHTNING DETECTION NETWORK IN MALAYSIA  
325 Partial Evolutionary ANN Training Technique for Grid-PV System Output Prediction  
326 Redistribution of Transmission Loss Based on Z-bus Method

327 Robust SMES Design Based on Inverse Additive Perturbation in an Interconnected Power System with Wind Farms  
329 Economic Analysis of Iran-Turkey Power Network Interconnection:HVDC vs. HVAC  
330 Modeling Dynamic Generation Companies bidding strategies  
331 Sensorless control of PMSG for micro wind turbine systems  
332 Optimal constrained power scheduling in Electricity Market  
334 Measured Impedance by Distance Relay in Presence of UPFC on Next Line  
337 Current Mode Control of Dynamic Voltage Restorer (DVR) for Power Quality Improvement in Distribution System  
338 Development of a Solar Tracker for Photovoltaic Assessment System  
339 Practical Current Control Techniques for Torque Ripple Minimization in SR Motors  
340 Voltage Injection Switching Inductor (VISI) method for Fast Transient Response in Switch Mode Power Supplies  
341 An Extended Kalman Filter for Sensorless Direct Torque Controlled IPM Synchronous Motor Drive  
342 Direct Torque and Flux Control of an IPM Synchronous Motor at Very Low Speed Without a Speed Sensor  
343 Reliability Evaluation of Distribution Systems in Presence of Distributed Generation Considering Recloser-Fuse Miscoordination  
344 Development of Artificial Neural Network Based Fault Diagnosis of Induction Motor Bearing  
346 APPLYING ARTIFICIAL NEURAL NETWORK FOR FAULT SECTION IDENTIFICATION IN DISTRIBUTION UNDERGROUND CABLE NETWORK  
347 Advanced Laboratory Scale Model of High Phase Conversion Power Transmission Line  
348 A new method for identification of main harmonic source based on the superposition and critical impedance methods  
349 Fuzzy Logic Based UPFC Controller for Damping Low Frequency Oscillations of Power Systems  
351 Fast Estimation of Transient Stability Constrained ATC by Relevance Vector Machine  
352 Reliability Centered Maintenance (RCM) on XLPE Cables in an Electrical Distribution System Considering Component Aging  
353 A Variable Gain PI Controller Used for Speed Control of a Simplified Direct Torque Neuro Fuzzy Controlled Induction Machine Drive  
354 A Predictive Control Strategy for the Sheppard-Taylor Based PFC Rectifier  
356 Self Commutation Soft Switched Bridgeless PFC Without Any Extra Switch  
357 DG Allocation Using an Analytical Method to Minimize Losses and to Improve Voltage Security  
358 Multi-objective Power System Planning by Artificial Life Simulation  
359 Reduction of Commutation Torque Ripple in a Brushless DC Motor Drive  
360 Improving Zonal Congestion Relief Management Using Economical & Technical Factors of the Demand Side  
361 CONGESTION COST ALLOCATION IN A POOL-BASED ELECTRICITY MARKET  
362 Electricity Market Models in Restructured Electricity Supply Industry  
363 Novel Quasi-Parallel Resonant DC-Link Inverter with One Auxiliary Switch  
364 A soft switching flyback current fed push pull dc-dc converter with active clamp circuit  
366 Evaluation of a Generic Virtual Power Plant Framework  
367 Power System Stability Assessment Based on Synchronized Phasor Measurements  
368 IMPROVEMENT OF A ONE CYCLE CONTROLLED PFC TWO-CELL BOOST CONVERTER WITH LEADING-EDGE MODULATION  
369 Static Security Assessment Using Artificial Neural Network  
370 PWM Technique to Control the Speed of Induction Motor using Matlab/xPC Target Box  
372 Simulation of a Matrix Converter Using IGBTs  
373 Zig-zag Transformer Based Electronic Load Controller for an Isolated Asynchronous Generator  
375 Kema Arc Model Parameters Identification in High Voltage Circuit Breaker with Genetic Algorithm  
378 Analysis of Disk MHD Induction Generator  
380 Performance of Permanent magnet assisted synchronous reluctance motor  
382 A Comprehensive Power Restoration Approach Using Rule-Based Method for 11kV Distribution Network  
383 Improvement in Ozone Generation with Low Voltage High Frequency Power Converters  
384 Power Plant Portfolio Optimization in a Regulated Environment Electricity Supply Industry: A Least Cost Generation Approach  
385 A Heuristic Trade off Model for Integration of Distributed Generations in Deregulated Power Systems Considering Technical, Economical and Environmental Issues  
386 Sensorless Induction Motors Based on Full-Order Luenberger Observer with Core Loss and Rotor Resistances Estimation  
388 Closed-Loop Control of AC/DC Three-Phase Current Injection Series Resonant Converter  
389 Optimal Tuning Of Temporary Droop Structure Governor in the Hydro Power Plant  
390 Determination of Mean and Variance of LMP Using Probabilistic DCOPF and T-PEM  
391 Laboratory Testing on Overhead Line for Various Load Conditions  
393 Nonlinear Control Schema with Direct Decoupling for Vector-Controlled Three-Phase AC Machines  
394 State Feedback Control of Boost Converter Using S1-Sigma Delta PWM Method  
397 A New Candidate Lyapunov Function for Power Stability with SOFC Power Plant Using a New Nonlinear Dynamic Model for SOFC  
399 Estimation of the Hot-Spot Temperature in Distribution Transformer considering Core Design  
400 Comprehensive model for simultaneous pricing of active and reactive power based on marginal cost theory  
401 Improved Regional Coordination of Generation Voltage Control  
403 Minimization of Monitoring Locations for Detection of Flicker sources by the Direction of Propagation Method  
406 Modeling and Simulation of Interior Permanent Magnet Motors with Saturating Magnetic Bridge  
407 Performance of Multi-Column MOVs for C Class Protection of AC Power Circuits  
408 Experience in HVDC Testing of Vulcanized Rubber in UTeM's High Voltage Laboratory  
409 Cost comparison breakdown for a stand-alone residential photovoltaic power system between an amorphous silicon and cadmium telluride in Malaysia  
410 Autoregressive methods in short term load forecast  
413 Non-Symmetrical SHE-PWM Technique for Five-Level Cascaded Converter with Non-Equal DC Sources  
414 High Temperature Solid Oxide Fuel Cell Integrated with Autothermal Reformer  
415 Risk Based Static Security Assessment in a Practical Interconnected Power System  
416 TRANSIENT SWITCHING OVERVOLTAGES IN TNB 132 kV CAPACITOR BANKS - STRESSES IN THE BANKS AND ASSOCIATED SUBSTATION EQUIPMENTS  
417 Modeling of Controller for Voltage Sourced Converter based HVDC Transmission System  
419 A Solution to Unit Commitment Problem Using Hybrid Ant System/ Priority List Method  
420 Analysis of the Small Signal Stability for the International Space Station/JEM Electric Power Systems  
421 Harmonic Optimization in Multi-Level Inverters using Harmony Search Algorithm  
422 High Performance Wind Power Generation System connected to DC Microgrid  
425 A New Genetic Algorithm Method for Optimal Coordination of Overcurrent and Distance Relays Considering Various Characteristics for Overcurrent Relays  
426 THE APPLICATION OF FREQUENCY DIELECTRIC SPECTROSCOPY TECHNIQUE IN ASSESSING THE DRYNESS AND AGEING STATE OF TRANSFORMER INSULATION SYSTEMS  
427 Power Quality Analysis Using Linear Time-Frequency Distribution  
428 Economic and Environmental Analysis of Micro Hydropower System for Rural Power Supply  
429 Fault Current Limiting in Distribution System with Penetration of DG Units using A New Dual Functional Series Compensator  
430 A non-invasive method for monitoring reactor and capacitor switching transient  
431 Implementation of New Control Method based on Dynamic Evolution Control with Linear Evolution Path for Boost Converter  
432 Impulse Voltage Distribution of Intershield Disk Winding vs. Interleaved and Continuous Disk Windings in Power Transformers  
433 An Improved Integer Coded Genetic Algorithm for Security Constrained Unit Commitment Problem  
434 Derating of Distribution Transformer under Nonlinear Loads using Time stepping Finite Element  
435 Robust Controller design for paralleled multi-inverter systems using &#956;-synthesis  
437 Effect of STATCOM on performance of unbalanced relay operation  
438 Determination of optimal incentives and amount of load reduction for a retailer to maximize profits considering Demand Response Programs  
440 Analysis of Torsional Interaction between Hydraulic Turbine-Generator and HVDC System  
441 Laboratory Testing on Three-Phase Transformer under Various Conditions  
442 Partial Discharge Characteristics of XLPE Cable Joint and Interfacial Phenomena with Artificial Defects  
443 A Strategy for Frequency Stability of Islanded Power Systems  
444 Optimal Bidding Curves for an Energy Service Provider in Iran Electricity Market  
448 Determination of New Transmission Congestion Management Scheme in Deregulated Power Systems by using Network Equivalent  
449 Development of New Control Strategy for Voltage sag Mitigation  
451 Load Sharing Characteristic of Single Phase PV Inverter Connected to Three Phase Grid  
453 Impact of Wind Power Penetration on Transients and Dynamics of Micro-Grids Due to Wind Turbine Structures and Operation constraints  
454 AN EFFECTIVE CONTROLLER TO DAMP THE DEVIATIONS IN A TWO-AREA HVAC/HVDC POWER SYSTEM  
455 Zonal Partitioning of Deregulated Power Systems using Fuzzy Monte Carlo Simulation  
456 A Low-Ripple Voltage Multiplier for X-ray Power Supply  
457 Simulation of DC DC Converter Control for Photovoltaic/Fuel Cell Hybrid Generation system  
458 Electricity Price Forecasting Using a Clustering Approach  
459 Energy Balance Analysis of Small Satellite in LEO  
460 Microcontroller Modulation for VLF High Voltage Generator rate 3 kV peak Using DSPIC-30F2010  
461 The Soft Switching Boost Converter with Power Factor Correction

462 The Proposed Humidity Correction Factor of Positive DC Breakdown Voltage of Sphere-Sphere Gap At  $h \approx 948$ ; Lower than 13 g/m3  
463 Analysis and Simulation of Possible Bifurcation and Subharmonic Oscillation in Transformer Coupled TCR System  
464 Improvement of Stability of Centurion Power Network using FACTS Controllers  
465 Optimal Washing Time Control Algorithm of the Drum Washing Machine Using an Inertia Estimator  
466 Effect of Lightning Induced Voltages on Gas Refinery using ATP-EMTP Program  
468 Voltage Control of Synchronous Generator for Ship Using a PMG type digital AVR  
469 Sensorless Nonlinear Control of a Doubly Fed Induction Generator Using MRAS Observers  
470 Power Socket Programmable Circuit Breaker System  
471 Space Vector Modulated and Vector Controlled Three-Level Four-Wire Unidirectional AC-DC-AC converter  
472 AN ALGEBRAIC METHOD FOR MAXIMUM POWER POINT TRACKING IN WIND TURBINES  
474 A Novel Control Scheme for Voltage Multiplier Based X-ray Power Supply  
475 Shunt Active Filter Based Power Compensator For High Power Loads With a Supercapacitor Bank Energy Storage  
476 Optimal Allocation of Distributed Generations and Remote Controllable Switches to Improve Distribution Network Reliability and Network Energy Loss  
477 Improvements on the High-frequency Signal Injection method for Permanent Magnet Synchronous Motor and its Application in the Hybrid Drive for Position Control  
478 AN HVDC/HVAC POWER SYSTEM WITH A COMPOUND PSS  
481 Application of Genetic Algorithms in the Design of a Solar Array-exclusive Standalone Photovoltaic System  
482 PARTICLE SWARM OPTIMIZATION AND GENETIC ALGORITHM TO OPTIMIZING THE POLE PLACEMENT CONTROLLER ON CUK CONVERTER  
484 NEW METHOD FOR ISLANDING DETECTION OF WIND TURBINES  
485 An Application of Fuzzy Logic Controller Based on STATCOM DC Voltage Control for Improvement Operation of Power System  
486 A DPGA based approach to Optimal RCS Placement in Distribution Power System Considering DG Islanding Impact on Reliability  
487 An Artificial Neural-Net Based Method for Predicting Distribution Transformer's Total Harmonic Distortions  
488 Analysis and Minimization of Input Current and Voltage Ripple of Five-Phase PWM Inverters  
489 Sensorless Predictive Torque Control by means of Sliding Mode Observer  
490 Simulation study of series hybrid propulsion system for a bimodal tram  
491 A Novel Circuit of a Single-Switch Electronic Ballast with a Boost-type Resonant Converter Applied to HID Lamps  
492 FREQUENCY SPECTRAL ANALYSIS OF ELECTRICAL PARTIAL DISCHARGE SIGNALS IN XLPE CABLE UNDER VARIOUS SOIL CONDITIONS  
493 Impact of Multiple Adjustable Speed Drive System to Power System Harmonics  
494 Adaptive Deadbeat Current Controllers for AC Induction Motor Control  
495 Market Oriented Reactive Power Expansion Planning using Locational Marginal Price  
496 New Vector Frequency Modulation for Power Conversion Circuits  
498 State of art on load monitoring methods  
499 Measured Impedance by Distance Relay in Presence of Inductive Fault Current Limiter  
501 Effect of Electrode Material on the Breakdown Voltage of SF6-N2 and SF6-CO2 Mixtures in a Weakly Non-Uniform Electric Field  
502 Enhancing Deregulated Distribution Network Reliability for Minimizing Penalty Cost Based on Reconfiguration Using BPSO  
503 Rectangular Current Commutation and Open-Loop Control for Starting of a Free-Piston Linear Engine-Generator  
504 Transmission Network Loss Allocation via Equivalent Bilateral Exchanges Principle and Genetic Algorithm  
505 Comparison of Active Power Filters with Series-Connected Capacitor  
506 A Small Scale Static VAR Compensator  
507 Optimizing the Grouping of Three Phase Electricity Installation Using Genetic Algorithm  
508 VALUE OF COMBINING WIND POWER AND HYDROGEN PRODUCTION IN SHORT-TERM ELECTRICITY MARKETS  
509 Comparison of Distribution Transformer Losses and Capacity under Linear and Harmonic Loads  
510 Determination Area of Vulnerability for Estimation of Unbalanced Voltage Sag  
511 Robust PSS Design Using H $\infty$  Loop Shaping Approach and Genetic Algorithms  
513 Modeling and Control of Sheppard-Taylor DC-DC Converter  
514 New switching method for Sheppard-Taylor PFC converter  
515 GAS BASED DISTRIBUTED GENERATION SYSTEMS, A KEY TO IRAN BUILDINGS GROWING ENERGY DEMAND  
516 HIERARCHICAL APPROACH IN STEAM NETWORK MODELLING  
517 Application of SARSA Learning Algorithm for Reactive Power Control in Power System  
519 Optimum Design of High Efficiency Synchronous Reluctance Drive Systems  
520 Simulation of the Impact of Harmonic on Distribution Transformer  
522 Design of a MIMO Controller for a Multimodal Dc-Dc Converter Based on Particle Swarm Optimized Neural Network  
524 Multi-machine Adaptive Optimal Power System Stabilizer Using RBF Neural Network and Tabu Search  
526 Tuning of Control Loops for Grid Connected Voltage Source Converters  
528 Coherency Approach by Hybrid PSO, K-Means Clustering Method in Power System  
533 Effect of Interline Power Flow Controller (IPFC) on Interconnected Power Systems Adequacy  
535 Multi-Agent Ant System for Redundancy Allocation Problem of Multi states power system  
536 Practical Sensor Fault Tolerant Sliding Mode Control Structure for Induction Motors  
537 A Remote Measuring System of Lightning Induced Voltage on Telecommunication Subscriber Lines (TSL) for Lightning Mapping System: A Mock and Equipment Set Up  
539 PSIM Based Electric Modeling of Supercapacitors for Line Voltage Regulation of Electric Train System  
540 Study on the efficiency of several single-phase PFC topologies  
541 Hardware Construction of a 5 kW Inverter for AC Power Supply Applications  
542 MPPT Performance of a Grid-connected PV Inverter under Malaysian Conditions  
543 Decoupling Voltage Controller Design with Time Response Specifications for Three-phase DC/AC Inverter  
544 Effect of Fill Factor on the MPPT Performance of a Grid-connected Inverter under Malaysian Conditions  
545 Regression Fitting Improvement through Applying SOM for Medium-Term Electric Energy Consumption Forecasting  
546 AN IMPROVEMENT OF ACTIVE POWER FILTER CONTROL METHODS  
548 Advanced Static VAR Compensator Using a New Topology of Multilevel Inverters Energized From Non-Equal DC Sources  
549 Development of Artificial-Intelligent Power Quality Diagnosis Equipment for Single-Phase Power System  
551 A New Method to Extract the Resistive Component of the Metal Oxide Surge Arrester Leakage Current  
552 A New Localised Lightning Locating System Utilising Telecommunication Subscriber Lines  
553 Control of Hybrid Fuel cell/Battery Distributed Power Generation System with Voltage Sag Ride-Through Capability  
554 Overview of an Extended Custom Power Park  
555 Bearing Fault Detection in Induction Motor Using Pattern Recognition Techniques  
556 Overview of modulation techniques for the four-switch converter topology  
559 A Simple Overmodulation Strategy Utilizing in DTC-Hysteresis Based Induction Machine Drives  
560 Electrical Model of Leakage Current Flow in Wooden Pole  
563 Sliding Mode Power System Stabilizer For A Single Machine Infinite Bus System  
564 Performance Study of a Diagonal MHD Accelerator for Space Propulsion  
565 Simulation of Power Electronics Converters with Sliding Mode Control Using PSpice  
566 Simulation of PV Cell Performance Under Actual Malaysia Operating Condition  
567 A Comparison Study on Particle Swarm and Evolutionary Swarm Optimization Using Capacitor Placement Problem  
568 Studying the Role of Regulator in Emerging Multi-Energy Market: A Simulation Approach with Agents  
569 A GIS Based Radial Distribution Network Planning Approach with Evolutionary Particle Swarm Optimization  
571 A Quick Dynamic Torque Control for DTC-hysteresis based Induction Motor  
572 Power Quality Behavior of Single Phase Fed Adjustable  
582 Power Supplies Efficiency and Energy Efficiency Practices  
583 A Development of Fuzzy Control of Hybrid Energy System using Ultracapacitor  
584 Analysis of Perturb and Observe Maximum Power Point Tracking algorithm for Photovoltaic Applications  
585 AN EXPERIMENTAL STUDY ON PARTIAL DISCHARGE CHARACTERISTICS  
586 The Effect of Multiple Lightning Impulse on the Electrical Characteristics of Opto-Isolators as Low Voltage Lightning Protective Device
