

Sun Developer Day

presented by Sun Microsystems

11am – 1 pm March 20, 2007

Massey University Wellington, Block 5, Level C, Room 12 (5C12) - Entrance A, Wallace St

Speakers

Matt Thompson

As Director of Technology Outreach and Sun's Open Source Programs Office, Matt Thompson leads Sun's technology evangelism efforts worldwide. His team focuses on educating and enabling the worldwide developer community to easily adopt Sun's emerging technologies like the core Java platform, the Sun Java Enterprise System, and Sun's secure mobility platform, as well as driving Sun's open source strategy for developers. Matt's 16 years of experience includes the software engineering of development environments, productivity tools, and object-oriented frameworks. Today, Matt spends most of his time focusing on delivering Sun's technology strategy to Sun's developers, partners and customers worldwide. Matt first started at Sun in 1988 and after several years "outside" at Taligent and General Magic he returned to Sun in 1997.

Angela Caicedo

Angela Caicedo is a Technology Evangelist at Sun Microsystems. Angela's expertise includes: Java ME, Java SE, Java EE, and the entire Sun Java Enterprise System. She loves spending time in new and cool technologies like: Game developments, 3D, bluetooth, smartdust (Sun' SPOTs), and others. She has also presented these topics at developer conferences around the world. Angela graduated from the University EAFIT of Medellin Colombia in 1998 with a B.S. in Computer Science.

During 1996-1997 Angela was a visitor student at Center for Educational Computing Initiatives at MIT. Prior to joining Sun, Angela worked for three years as a software developer and researcher at the Swiss Federal Institute of Technology (EPFL), in Lausanne Switzerland, and participated in several European Projects. Angela has also done research on Intelligent Agents which is one of her specialties.
