## ANZCON feedback:

1) New Zealand Council cannot be involved in financing ANZCON like the Australia Council, since we do not have a specific financial identity. All financial dealings regarding ANZCON is recommended to be handled by the host sections themselves.

The alternate suggestion is that both New Zealand Council and Australia Council can coordinate ANZCON selection process broader logistics, marketing, scheduling etc. Australia Council can still choose to directly deal with the host section and sort out financial support and the like. If this is not agreed then Australia Council will have to take financial control and liabilities if it is held in Australia but for New Zealand the host section will be the counter party.

We also noted that usually this event is hosted in a University and there could be issues in some location with coordination with the University premises, costs, liabilities etc. This is particularly to be noted because attendees will not only be University students but working engineers from Young Professional group.

2) Page 6(Congress Assignment section)

No mention is made who the selection committee is to be. Some forward reference has to be made here if it is to be discussed in the later sections.

The composition of the ANZCON committee will have to comprise the relative weights of the sections from the two countries. Council Chairs or their representative from both countries can automatically be 2 default members. Since this is held once in 2 years some kind of rough guideline of on an average how it rotates amongst countries can be thought of (no firm recommendation but just a guideline perhaps).

3) Page 7.

No time-line mentioned here about the call, decision making process etc.

It is suggested that this details be provided before conditions are indicated once the site selection procedure and time-line is explicitly identified.

4) page 8.

Suggest the first bullet point adds the word "affordability"

Thus it will read "The availability and affordability of suitable accommodation for registrants and visitors"

5) Proportional hosting rights for ANZCON amongst countries.

As per item 2 discussion section II can have guidelines regarding some general principles that will guide the selection committee in years to come. Things like ensuring on an average proportional hosting rights amongst 2 countries etc.

6) page 11 (missing items)

No items regarding marketing and publicity of the event has been mentioned elsewhere in the document. Suggest something to be put here.

Also Conference management practices etc. should be roughly indicated here so that bid proposers know what all needs to be included. Thought Conference Organizer's manual has been indicated in page 12, some explicit mention of it can be indicated.
