

## Joint Institutions Annual Breakfast Event 2018

The Joint Institutions Breakfast Event was another in a series of seminars involving prominent speakers from across all aspects of industry. This year's event was held on the morning of 19 September 2018 at the Wellesley Boutique Hotel in Wellington. About 35 people participated in the event, with a good spread of members across the three Institutions: Institution of Electrical and Electronic Engineering, Institute of Engineering and Technology and Engineering New Zealand.

The members enjoyed some networking over a delicious buffet breakfast before the guest speaker was introduced. Mr Tony Ryall, the Chair of Transpower provided a most illuminating talk on the topic of "How Transpower is thinking about the future of the electricity industry in New Zealand". He highlighted his talk with some key trends and the initiatives being taken to address these trends. His talk inspired many questions from the audience, which generated a great discussion, and was supplemented with information from some of the Transpower engineers within the audience.

Feedback from the event has been very positive, with several members of the audience commenting on the quality of the speaker and the ensuing discussion.
