Next Section Meeting

The **January Section** meeting will be a presentation by Mr. Ronald Wilt, Project Manager for the Pennsylvania State Police Criminal Investigative Traffic Safety Incident Information Management System (IIMS). This system will replace the Commonwealth Law Enforcement and Administrative Network (CLEAN) system. The present CLEAN information system is regulated by the PA State Police. The new IIMS system will tie into the new National Crime Information Center (NCIC 2000) maintained by the Federal Bureau of Investigation. The IIMS will use wireless technology for individual Pennsylvania State Police. It is a great technical leap from the old system.
