

Web multi-browser developer

Status:	<i>Full time, employee</i>	Shift:	First shift (Day)	Job location:	Orlando (Florida)	Reference code:	2WI101010
Company information:							
<p>We are a new, stealth-mode IT venture, founded by a team of serial and highly experienced entrepreneurs. We are committed to the development of a series of original, patent-protected solutions that revolutionize the brand-customer relationship thereby making marketing, advertising and sales strategies and programs more productive. Our focus is on total customer engagement.</p> <p>We are currently seeking the best experts to team-up with us for the successful development of the venture. Thanks to the early stage, the team members will be offered unique career opportunities: thrive excellence, apply own creativity, building-up solutions to new relational concepts, and gradually, but quite quickly, assume management responsibilities within the company. The whole world and different cultures will open-up to you.</p> <p>We work in a fast pace, under pressure, handling multiple tasks, concerned about details and individual reliability, BUT we care that you enjoy your work, as well as your private life.</p> <p>Human values are as important as professional skills in our company. Our management belief: to provide to our team the most rewarding working environment of their whole professional life!</p>							
Position description:							
<p>The web interface developer will take in charge the following responsibilities, as short/mid-term objectives:</p> <ul style="list-style-type: none"> • designs and develops the product's graphical user interface – using an MVC framework - the interactive website, logos, and other design/multimedia work • participates to the design and develops graphical prototypes under Chrome/Chromium, Mozilla and Safari • articulates design concepts to a variety of audiences including software engineers, management, sales people, and of course clients • participates to the elaboration of innovative interactive documentation, as an integral part of our product functionality <p>This is an ideal professional career path to excellence, breaking ground innovation and to assuming higher level responsibilities within the Company.</p>							
Reporting structure:							
The user interfacing developer will report to the CTO.							
Required knowledge, skills and education:							
<ul style="list-style-type: none"> • minimum 5 years experience in developing web interface /navigation, design, and graphic design using HTML5 and JavaScript technologies under Chrome/Chromium, Mozilla and Safari browsers • good experience in LAMP with Zend Framework • software development based on OOP and modular/pattern construction • significant experience in implementing fast-response user web technology components (AJAX) • a good expertise of website architecture and web page design • at-ease using both Adobe suites and Eclipse • enthusiasm for creating cutting edge user interface design, taking into account artistic look, functionality split-up and dynamic use performance • excellent communication skills – forward thinker, enthusiasm for learning new technology and challenged by innovation <p>Work experience in an Internet advertising agency is a big plus. A Bachelors degree with background in design and usability is desirable, but proven experience, passion and innovation drive are key in our search.</p>							
Company benefits:							
We offer a comprehensive compensation and benefits package, including starter stock.
