MD Resources (IEEE account required)	New Members	SAMIEEE	Reports	Webcasts	MD Kit Ordering	Presentations

	Recruitment Activities	Retention Activities
MAY	Half-Year Dues Cycle —IEEE accepts ½-year dues for the present year of service. Individuals who join IEEE in May receive 8 months of membership for the price of 6. Order MD Kit for upcoming events / member recruitment opportunities (no cost).	First Year Members – Member retention begins the day after a new member joins IEEE, and receives a personal greeting from like-minded members and Volunteers. Don't forget to make use of the new member rosters, available to Section and MD officers monthly.
JUN	Half-Year Dues Cycle – IEEE accepts ½-price dues for present year of service. Individuals who join IEEE this month receive 7 months of membership for the price of 6. Order MD Kit – for upcoming events / member recruitment opportunities (no cost).	First Year Members – Member retention begins the day after a new member joins IEEE, and receives a personal greeting from like-minded members and Volunteers. Don't forget to make use of the new member rosters, available to Section and MD officers monthly.

March Summary

Our YoY decline in total active membership remained about the same in March—however, the *composition* of the losses has shifted since February. Through an aggressive arrears-recovery effort in March, we moved into positive territory with member renewals: up +797 YoY, after being down by (4,000) at month-end February. While we made substantial headway with renewals in March, member recruitment and reinstatement traversed in the opposite direction. Declines in member recruitment and reinstatement during the 2012 membership year are now driving the (2,408) YoY in total active membership.

Without continued improvement in the recovery of IEEE and Society memberships, combined with a substantial increase in new member recruitment, the success and finances of the 2012 membership year—and ostensibly the 2013 membership year—are in peril. For an explanation for how member retention impacts membership contraction and expansion, see page 4.

Renewal / Recovery – In March, our member retention gap of (2.3%) YoY, narrowed to (1.3%) globally. In the United States, higher-grade member

renewals continue to lag behind same-period 2011 by about 2,500 members. The Volunteer and Staff MD team is ramping-up the intensity of the member-recovery campaigning in April, adding the coordinated outreach efforts of 50 IEEE Sections globally. For more on member recovery efforts and retention, see page 3.

Recruitment – A decline in YoY member recruitment was, in part, attributed to a couple days of down time for the online membership application related to the IEEE’s transition to a new business system. While total recruitment for the 2012 membership year is down by (0.6%) through March, undergraduate student recruitment is up +3.0%. With the half-year dues period upon us, we encourage all Sections to order an MD Kit in preparation for their upcoming events. Recruitment details and updates, page 6.

Reinstatement – Member reinstatements in March fell short of last year by 29%, after February’s YoY monthly gain of 53%. Campaigns to former members will continue through August.

Society Memberships – Arrears recovery efforts in March reduced the YoY losses in total Society memberships by about 1,000 members. Declines in Society memberships remain widespread, with two-thirds of IEEE’s Societies incurring YoY losses exceeding 1%. Robotics and Automation leads the way in outperforming last year, by +17.9%. Society memberships detail, beginning page 12.

IEEE Sections Mobilized for April Member Recovery Drive

While some IEEE Sections have already outreached to their members in Arrears, a coordinated effort globally is now underway. To augment the member recovery campaigns from IEEE headquarters, 50 IEEE Sections are launching independent outreaches in April (see adjacent table). The April recovery drive leverages operational and follow-up support from IEEE staff located in both the Piscataway and Singapore offices.

Planning for April's grassroots, member recovery drive began in early March. Participating Sections began customizing a communications template used for member recovery campaigns, and forwarded their final version to the MD staff for uploading into e-Notice. The e-Notice campaigns are configured as coming from the Section volunteers. Upon launching the e-Notice campaigns, the authoring Section Volunteers stand ready to receive member replies, which are then forwarded to staff in the IEEE Support Center for direct follow-up and resolution by a staff associate.

This style of collaborative Volunteer/Staff member recovery effort was first pioneered by IEEE Region 8 in 2008, as a Region-initiated campaign. This year's effort evolves the methodology to (1) provide dedicated, MGA staff support to different IEEE Regions, and (2) having each e-Notice campaign originate from the Volunteers in each Section.

Member Recovery Drive 2012 – Participating Sections

Member Recovery Calendar

For the balance of the membership year, until August, a series of member recovery campaigns will seek to win back those members whose service was deactivated in February. In parallel with the campaigns, Staff Associates with IEEE's Support Center phone calls outreaching to longer-term members to help facilitate their renewal.

Period	Action	Arrears Audience / Media
2 Apr	HQ Campaign	All higher-grade members / postal campaign All student members / e-mail and pdf file
25 / 30 Apr	Section Campaigns	Higher-grade members in Arrears within Section. See participation roster above. / e-mail
25 Apr	HQ Campaign	All members in Arrears, save those targeted by Sections / e-mail
7 May	HQ Campaign	All higher-grade members / postcard All student members / e-mail
21 May	HQ Campaign	All members in Arrears / e-mail
4 Jun	HQ Campaign	All members in Arrears, last notice for student / e-mail
18 Jun	HQ Campaign	All members in Arrear/ e-mail

Frequently Asked Questions...

How Does Retention Impact Membership Expansion and Contraction?

j.day@ieee.org

All membership development is local. IEEE membership performance globally is merely the aggregation of the annual membership performance across 330 Sections, with Regional performance reflecting the activity across a geographic subset of Sections. Total Society memberships are merely the aggregation of the annual membership performance across 38 IEEE Societies.

Every year, three variables contribute to the size of membership in any IEEE organization: renewal of existing members; recruitment of new members, and reinstatement of former members. Student elevations contribute to the renewal of existing members, albeit at a different member grade. By virtue of volume, member renewals are the dominant and probable determinant of whether or not a membership will expand or contract year-over-year. A membership can still grow with attrition; so long as the rate of attrition is outpaced by new member recruitment and reinstatements.

Member Renewals vs. Member Retention

The renewal of members constitutes the largest portion of the membership, accounting for up to about 75% of the membership growth from one year to another. Renewal progress is tracked from two perspectives:

Member renewals—The number (count) of individuals who have renewed their membership for the present membership year.

Membership retention—The percentage of individuals who have renewed their membership. The denominator, or renewal opportunity, is the total number of individuals who are eligible for membership renewal, i.e., the total active membership as of 15 August.

Student Membership & Elevations

Students are a subset of the IEEE membership, and share similar variables impacting membership development. An additional variable—student member elevation—influences the inflows and outflows of membership development on two fronts: (1) a subtraction from the ranks of student membership, and (2) an addition to the ranks of higher-grade membership. This same cycle occurs year-over-year. Trending with student member elevations is influenced, albeit a year or two later, by patterns in student recruitment.

student member elevations, a trend that is forecasted to continue in 2012. This decline in student elevations, after several years of upward trending, is traced back to a slowdown in student member recruitment that began in 4Q-2010.

Virtuous Cycle	Vicious Cycle												
<p>By 15 August, the total active membership has <u>increased</u> YoY. The increase in membership results in a <u>larger denominator</u> (opportunity) for renewal in the succeeding membership year.</p> <p>example: Asia / Pacific (R10)</p> <p>Year-over-year August, Region 10 posted the following membership totals on 15 August:</p> <table style="margin-left: 40px;"> <tr><td>2011 ...</td><td>80,327</td></tr> <tr><td>2010 ...</td><td>79,738</td></tr> <tr><td>2009 ...</td><td>71,661</td></tr> </table> <p>Even if the membership retention rate remains the same year-over-year, total membership in Region 10 will likely increase so long as the size of the active membership / renewal opportunity is larger every August.</p> <p><i>Recommended actions ...</i></p> <ul style="list-style-type: none"> • Substantially improve member retention across all grades • Promote e-Member recruitment in eligible countries 	2011 ...	80,327	2010 ...	79,738	2009 ...	71,661	<p>By 15 August, the total active membership has <u>decreased</u> YoY. The decrease in membership results in a <u>smaller denominator</u> (opportunity) for renewal in the succeeding membership year.</p> <p>example: United States (R1-6)</p> <p>Year-over-year August, the U.S. posted the following membership totals on 15 August:</p> <table style="margin-left: 40px;"> <tr><td>2011 ...</td><td>196,260</td></tr> <tr><td>2010 ...</td><td>198,198</td></tr> <tr><td>2009 ...</td><td>199,192</td></tr> </table> <p>Even if the membership retention rate remains the same year-over-year, total membership in the U.S. will likely decrease so long as the size of the active membership / renewal opportunity is smaller every August.</p> <p><i>Recommended actions ...</i></p> <ul style="list-style-type: none"> • Substantially increase member recruitment of students and professionals • Improve first-year retention of higher-grade members 	2011 ...	196,260	2010 ...	198,198	2009 ...	199,192
2011 ...	80,327												
2010 ...	79,738												
2009 ...	71,661												
2011 ...	196,260												
2010 ...	198,198												
2009 ...	199,192												

Membership Retention Update

As of this March, we narrowed our retention gap globally to (1.3%) year-over-year (YoY), compared to (2.1%) last month. At right, the table reports the YoY delta in the member retention rate. The actual retention rates for March 2011 and 2012 are found below, in the table, “IEEE Membership Renewal / Retention – March 2012.”

When tracking retention rates YoY, we are actually comparing progress against two different denominators, i.e., from one year to another, the size of the renewal base changes. Hence, why the renewal count for higher-grade membership in the United States remains down by (3,000) members YoY, despite being within 1% of last year’s membership retention rate. Because the United States is working with a smaller renewal base in 2012 vs. 2011, matching last year’s *renewal counts* would require us to exceed by +1.5% last year’s retention rate. For further explanation, see “How Does Member Retention Impact Membership Expansion and Contraction,” page 4.

First-Year Members

Renewal progress with first-year members is better than the total membership; first-year member renewals trail last year’s retention rate by (0.3%), compared to (1.3%) for all members. Given the historical attrition levels of first-year members, increased focus and renewal success with this constituency helps drive improved results with total membership retention. Impact will vary by Region, however, as the percentage of first-year members to the total membership is different from one Region to another.

➤ Recruitment

Recruitment Update

Our total YoY recruitment in March underperformed same month last year for both students and higher-grade members. In part, this was caused by IEEE’s transition to a new business management system, which required down-time for online applications the last couple days of March; consequently, 500-600 prospective recruits would not be able to join IEEE until 1 April.

Cumulative recruitment for the 2012 membership year is strained. For the period, September through March, our recruitment is down (0.6%) YoY compared to same period last year; in February, we were up +2.0% YoY. As we progress further into the membership year, member recruitment should become the primary focus, and we encourage all Sections and Student Branches to order an MD Kit for upcoming events where non-members may be in attendance.

IEEE-USA Recruitment Incentive Update

We are pleased to recognize those Sections who are qualifying for the incentive as of this month (see table).

In an effort to drive U.S. membership growth in Regions 1-6, IEEE-USA is offering a financial incentive that rewards year-over-year improvements in the recruitment of higher-grade (HG), dues-paying members in U.S. sections. Qualification requirements are as follows:

- 1) Sections must maintain their *total* HG dues paying membership count at the same level as the prior year.
- 2) Sections must exceed their annual, HG recruitment year-over-year.

2012 Membership Year Incentive Qualifying Sections	
R1 – Maine	R4 – Iowa-Illinois
R1 – New York	R4 – Red River Valley
R1 – Springfield	R5 – Panhandle
R1 - Syracuse	R5 – Southwest Missouri
R2 – Youngstown	R5 - Wichita
R3 – Charlotte	R6 – Central Coast
R3 – Daytona	R6 – Central Washington
R3 – Florida West Coast	R6 – Foothill
R3 - Piedmont	R6 – Las Alamos / Northern New Mexico
R3 – Western North Carolina	R6 – Oregon
R3 – Winston / Salem	R6 – Palouse
	R6 – San Fernando Valley

Be prepared for your upcoming member recruitment opportunity by ordering (at no cost) an IEEE membership kit. **ORDER ONLINE** - web account required

Recruitment Best Practices & Tools

Peer-to-peer referral is the most prominent means of member recruitment. Individuals are not likely to join IEEE unless they are asked. An effective membership recruitment plan integrates multiple tactics that build awareness about IEEE, and cultivate an individual's interest in becoming a member. Your Section might consider the tactics and tools below.

- ✓ For all Section events and activities in which non-members may be in attendance, (1) have membership brochures available, and (2) dedicate time to asking non-members to join IEEE.
- ✓ Use the **half-year dues** period as a peak recruitment time. This allows people to test IEEE membership for a smaller initial monetary outlay. New members pay half-year dues when they sign up from 1 March through 15 August. Services commence immediately upon joining and continue through December.
- ✓ Advertise Section and Chapter events effectively. Get your event covered in a local newspaper. If people see your advertisement, it may spark their interest in attending your event and joining IEEE.
- ✓ Bring a friend or colleague to a Section or Chapter meeting.
- ✓ Include membership recruitment reminders in Section and Chapter newsletters.
- ✓ Aggressively promote IEEE membership during technical conferences. Distribute IEEE membership applications to conference attendees or encourage them to apply online.
- ✓ Announce and provide information on the Member-Get-A-Member program at Section, Student Branch and Chapter meetings.
- ✓ With company permission, post notices of IEEE activities on office bulletin boards and electronic communication. Submit articles on employee IEEE involvement and show how this can reap benefits for the company as well.
- ✓ Conduct a Professional Society Day and have a table exhibit of IEEE benefits and services such as IEEE continuing education courses and Standards committee participation.
- ✓ Share positive IEEE experiences with your colleagues during professional meetings. This will show potential members what IEEE means to you.
- ✓ Plan national engineering days and week-long celebration displays and exhibits for businesses.

Recruiters of the Month – Member-Get-a-Member (MGM) Program

We're pleased to recognize this month's top program participants. The IEEE Member-Get-a-Member (MGM) program is a peer-to-peer recruitment activity offered exclusively to IEEE members. MGM is popular with student members; accordingly, program results often ebb and flow with the academic school year. For program information, visit www.ieee.org/mgm.

IEEE e-Membership / Developing Nations

Mar '12

www.ieee.org/emember

2012 e-Membership by Region (Cumulative through Present Month)

e-Membership Count	R3*	R8	R9	R10	total
54	4,533	3,983	10,907	19,477	
% of Eligible Higher Grade Members	51%	53%	65%	67%	63%
% of All Higher Grade Members	0%	11%	58%	26%	17%

*R3 denotes Jamaica

March Update —

In March, our total e-Membership count grew to 19,477, up +41% YoY compared to same-period 2011. Program participation now stands at 63% of members, i.e., those who chose the option of e-Membership when they joined IEEE, renewed, or reinstated their membership. On average, 78% of eligible new recruits are choosing the e-Membership option, with Region 10 having the highest recruitment take-rate at 82%

With the bulk of renewals behind us, the slope of e-Membership is tapering; through the end of the 2012 membership year, recruitment and reinstatement will begin driving most of the e-Membership gains.

2012 e-Membership Participation*

Total, across all eligible countries

*Percentage of eligible members (cumulative) who have selected e-Membership

2012 MD Drivers - e-Membership

[see explanation key](#)

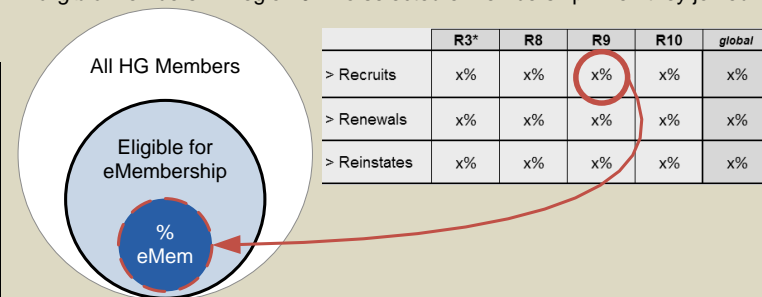

By category, the % of eligible members who have selected e-Membership

Cumulative Through Present Month	R3*	R8	R9	R10	total
> Recruits (new members)	0%	69%	75%	82%	78%
> Renewals (existing members)	34%	50%	62%	62%	58%
> Reinstates (former members)	22%	61%	72%	70%	68%

*R3 denotes Jamaica

Explanation Key

IEEE's e-Membership program is available to a subset of all higher-grade members. The table above reports how different MD drivers are impacting participation. In the example below, the circled cell represents the percentage of eligible members in Region 9 who selected e-Membership when they joined.

Row percentages will not sum to 100% on account of different denominators.

e-Membership FAQs

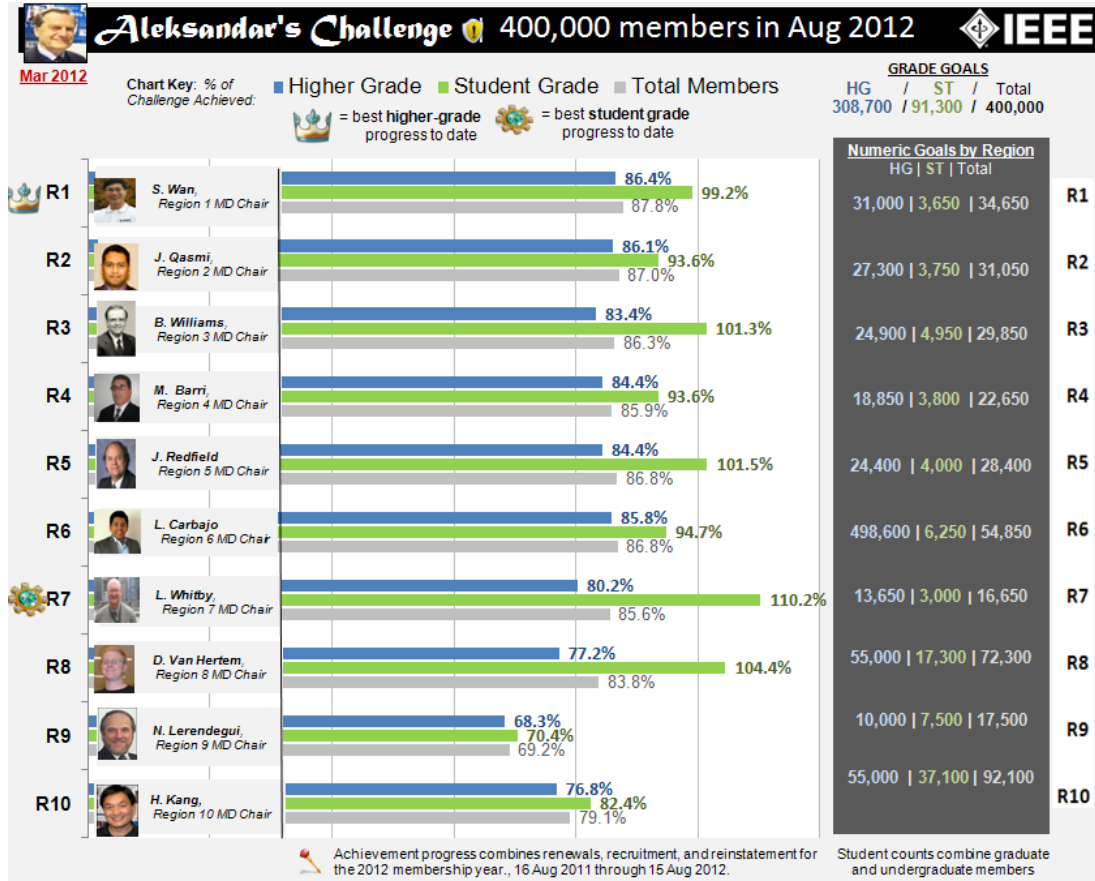

Can I join a Society as an e-Member?

e-Members can add as many society memberships as they wish, at whatever price the individual society offers. The e-Membership dues fee only applies to IEEE membership.

What happens after I join or renew after selecting the e-Membership option?

You will receive a secure PDF via e-mail that contains your membership card and membership materials.

Progress Update – 2012 Membership Year & Goals

While we continue to progress against our August goal, we are at continued risk of not achieving 400,000 members by August – unless we are more successful with recovering members in Arrears, and jump-starting our recruitment efforts. A reminder that the half-year dues period is upon us; the reduced price offers an attractive promotional incentive for introducing individuals to IEEE. Don't hesitate to order an MD Kit at no cost to your organization unit.

Important Note – The present status reporting for 2012 goal attainment has not reconciled student member elevations, yet to occur in June and August. Consequently, until August, progress bars for student-goal attainment will be overstated, and higher-grade goal attainment understated. Student member elevations have no impact on goal attainment reporting for total membership.

About the Goals – The 2012 goals used for this challenge are apportioned based on a Region's relative size and historical MD momentum, while also ensuring fulfillment of MGA's forecasted revenue budget for 2012. With targeted MGA focus on the United States, we are challenging Regions 1-6 to match its 2011 higher-grade membership, and increase student membership by 20% (IEEE Student Activities Committee is developing an action plan). Region 7 is asked to continue its steady pace of growth, with Regions 8 through 10 being challenged to expand awareness and adoption of the e-Membership option in developing nations.

Be prepared for your upcoming member recruitment opportunity by ordering (at no cost) an IEEE membership kit.
