Subject: Hampton Roads, VA Section Report

Hampton Roads Section Report to Virginia Council - March 24, 2001
Officers for this year are: Chair - Sam Simmons, Vice-Chair - William Edmonson,
Secretary - Tim Gavin, Acting Treasurer - Tim Gavin.
In January we hosted our annual student paper contest with entries from Hampton
University and Old Dominion University. Our February
speaker covered Earth Leakage (ground fault) Breakers for the 60 to 600 ampere
range.
And our March group learned about Bioelectrics and the research being conducted
on the effects of different voltage potentials on cells.
Hampton Roads will be hosting the Second International Symposium on Nonthermal
Medical and Biological Treatments using
Electromagnetic Fields and Ionized Gases in May. Our Section hopes to be
represented at the symposium since IEEE is one of the
sponsors.

Sam Simmons
Chair
