Subject: Hampton Roads Section Report

The Hampton Roads section of the IEEE has no meetings during the summer. Our first meeting was on the 19th of September. This year we are providing support for the Senior Design class of Hampton University where they will be building a robot to compete in the hardware contest at Southeastcon03. October meeting will be a design review of the students project. It is our goal to try to increase the number of attendees at our meetings. Also, we are still planning to become more visible in preparing and recruiting K-12 students in science math and engineering.

The attendance at our meetings has been approximately 10-15.

SECTION'S ATTENDANCE TO CONGRESS: William Edmonson
