

GIRL SCOUT REPORT

The **Electricity Demonstrator** was used at the 90th anniversary of the Girl Scouts in Richmond on October 4. There was a celebration at the Richmond Convention Center. Several hundred Girl Scouts used the IEEE equipment and learned something about electricity. See <http://www.comgirlscouts.org/NavigationFrame.htm> .

The Children's Engineering Convention will be held in Richmond at the Richmond Marriott West at Innsbrook during March 25 - March 27, 2004. My intention is to introduce the science teachers of Virginia to the **Electricity Demonstrator** and tell them about its availability. Since our members would work as volunteers, Saturday, March 27 would be best for us. George Willcox, Andy Shulick, Linda Harpine and I will negotiate the participation of the IEEE. See <http://www.vtea.org/ESTE/convention/> .

The **Electricity Demonstrator** is available to the five Virginia Sections. For a description, see <http://www.ewh.ieee.org/r3/vc/> .
