"communications"  
Coffee and doughnuts served after the meeting.

RANDOM NOISE by R J KELLER-PUBLICITY CHAIRMAN

There comes a time in each Publicity Chairman's reign when all plans fall through. For instance-last month I promised a copy of the years program so that all may make plans accordingly. Sorry about that. The Section Secretary Press has been delayed courtesy of the U.S. Mule. Hopefully it will be available next month.

For instance-Ken Stoltenberg (local GE representative and March meeting Program Coordinator) indicates that he has had some problem obtaining a committed speaker for this program. It seems that the original program fell through several times. Thanks to Mr Peterson and Mr Stoltenberg, an excellent program should be had for all. The latest word in mobile communications is mobile teleprinters. Make sure you attend this meeting. However, should this program fall through for any reason, Ken promises a Bell Telephone film of an appropriate technical nature.

Our thanks goes to Woody Beeler for the excellent talk on "the electrical activity in nerve and muscle".

A reminder that the April meeting is our traditional "STUDENT DINE-IN".

It may be of interest that our section now has a felt banner to grace our meetings. There will no longer be any doubt as to which meeting we are looking for or attending when we run into the situation of having several meetings of various types going on when the IEEE meets.
