

2014 Region 5 Meeting – Student Competition Report

Three student branches in the Central Texas Section participated in competitions at the 2014 Region 5 Conference in Corpus Christi April 5th.

Ten student teams from around Region 5 competed in the Ethics Competition. Two of the three awards given went to CTS teams. The UT team placed first and the Trinity University team placed third. Tyler Walker and Connor Weins of UT and Eric Schluter and Zachary Meicler Garcia of Trinity are shown in the photographs with their certificates.

Estimates varied, but about 30 teams from Region 5 student branches competed in the ever popular Robotics Competition. UT entered one robot and Texas State entered two robots. One Texas State team tied for fourth place. Only ten teams made it into the finals after three brutal preliminary rounds.

The IEEE Central Texas Section is pleased to support the student branches in its geographical area and is proud of their accomplishments.
