New course available in Electrical and Computer Engineering for Spring 2007

# **Advanced Silicon Technology EE 441/541**

Semiconductor technology is the engine room of the New Economy. For 40 years, there has been continuous improvement in IC functional capability with smaller size, increased reliability and lower cost. This course will consider the advanced processing that made this tremendous development possible.

**Mondays and Wednesdays**

**5 pm – 6:15 pm**

**ET104**
