

Power System Engineer (Design focus) - 002BYW

JOB SUMMARY

Schneider Electric Engineering Services is seeking an experienced Power System Engineer to join a high performing team responsible for design consulting services focused primarily on MV/LV power distribution, substations, and advanced switchgear controls for the industrial, infrastructure, and critical power sectors.

SKILLS

- *Work effectively within a team
- *Strong oral and written communication skills
- *Ability to build client confidence as a trusted advisor
- *Able to manage and prioritize multiple projects
- *Manage scope, schedule, and cost on projects
- *Proficient in AutoCAD and Microsoft Office suite
- *Experience with Microstation, Revit, Sag10, SKM, ETAP desirable

Qualifications

- *BSEE or MSEE with power focus preferred
- *Registered Professional Engineer
- *10+ years of experience in medium and low-voltage power system specification, design and analysis.
 - Knowledge of switchgear, motor control, power transformers and cables, emergency power and UPS systems, protective relaying, equipment and system grounding, lightning protection, and utility interconnection requirements.
 - Experience performing short circuit, coordination, load flow and arc flash studies.

Care. Connect. Challenge. Commit.

Our values define our company. Who we are, our customer approach, how we do business, what it's like to work here, and the kind of people we want to attract and retain. We care for our planet, our customers, our company, our team, and ourselves. We connect to customers and colleagues; we are open and respectful. We challenge others and embrace challenges ourselves. We commit to change by leading the change.
