Subject: Integrated Distribution Equipment

Speaker: Finn Schenck – Senior Sales Executive, Square D Company

The major manufacturers are all offering Integrated Distribution equipment where they have combined panelboards, switchboards, and transformers into Unitized type enclosures, NEMA 1 and 3R. The goal of Integrated Equipment is to reduce the space required for a given electrical layout. The results show that Integrated Equipment can also provide cost savings to the customer. Join us for a review of the various Integrated equipment offerings and how this product line can solve your Equipment Space, Project Cost, and other design challenges.

Finn Schenck is a Sr. Sales Executive with Square D Company, where he calls on Consulting Engineers, Contractors, and End User accounts. Finn has been with Square D Company for 18 years, and has a degree in Mechanical Engineering from San Jose State University. "Go Spartans!" A past Chairperson for OEB IAS and SF IAS, Finn is currently the Treasurer of SF IAS.

Please join us in welcoming our speaker to San Francisco for what is sure to be an interesting and productive session.
