Subject: Get Ready! Plug-In Electric Vehicles are Coming! And You're at Ground Zero!

Ready or not, the San Francisco Bay Area is among the locations where large numbers of early adopters of plug-in electric vehicles reside. While these users may keep their "range anxiety" to a minimum by keeping round trip travel from home within the vehicle battery range, demand will grow for electric vehicle charging stations in commercial applications to handle the cars of employees, customers, or both. This presentation will dig into the terminology, codes, standards, and application issues that you need to be familiar with to accommodate electric vehicle charging of stations into your electrical distribution designs.

Speaker: Gary H. Fox, PE. - GE

Gary H. Fox, PE, received his BSEE from California Polytechnic State University, San Luis Obispo in 1978. He has been employed by General Electric Company for 32 years. His current assignment is a Senior Specification Engineer for GE Energy in Concord, CA, providing application and technical support for power distribution and control equipment.. Mr. Fox is a Senior Member of the IEEE Industry Applications (IAS) and IEEE Power Engineering Societies and has been an active participant in the IEEE since 1989. He has authored several papers on protective relay application and surge protection. He was a recipient of the IEEE Third Millennium Medal. He has been a licensed Professional Engineer since 1982..

Please join us in welcoming our speaker to San Francisco for what is sure to be an interesting and productive session.
