

Sr. Engineer (Contract)

Position Overview:

Sony Ericsson is looking for passionate senior engineers with a proven track record. The engineers will be an integral part of the team that is developing software and services for Sony Ericsson's Windows Mobile phones.

Day-to-Day Experience:

The senior engineer will be working with a team of developers to define and create the next generation of applications and services for Sony Ericsson's Windows Mobile platform. Candidate will also work with key mobile software partners to ensure that the applications achieve a desired level of performance and usability. The candidate should demonstrate flexibility, commitment, and strong communication skills. Candidates should have strong command of frameworks and mobile technologies. Experience creating windows mobile applications is highly desired. Candidate should be self motivated with an entrepreneurial mindset.

Additional Responsibilities Include:

To Qualify for This Role, You Must Have:

- 7+ years of software development experience with C/C++, Java, and .Net
- 2+ years of experience implementing and designing Windows Mobile applications
- Familiarity of frameworks & web technologies
- Familiarity with Web 2.0 concepts, experience with Web services, Object Oriented Design, SOAP, and AJAX
- Good design fundamentals.
- Excellent written and verbal communication skills
- Background in embedded systems is desired.
- The Sony Ericsson development environment is Windows-based. Familiarity with PCs, Microsoft Office and related tools is essential.
