

# *Institutskolloquium*

Thema: **Critiquing and reminding**

Referent: ***Prof. Dr. Arie Hasman***  
**Academic Medical Center (AMC), ABC/ICT, Attn: CERT-AMC,  
Meibergdreef 9, NL-1105 AZ Amsterdam**

Ort: **Bibliothek des Institutes für Medizinische Informatik  
Etage 1, Flur 28, Raum 13 des Universitätsklinikums Aachen,  
Pauwelsstr. 30, 52074 Aachen**

Zeit: **Freitag, den 14. Januar 2005, 14.15 bis 15.45 Uhr**

---

## ***Abstract:***

Several studies have shown that the quality of patient care is not optimal. Although increasingly guidelines are developed their use is not widespread. A description of the management concerning the current patient in a guideline is often hidden between information for other types of patients.

Computerized guidelines may offer better opportunities. In this presentation I will present results of work carried out in Maastricht and in Eindhoven concerning the development and use of computerized guideline systems.
