

BHI-2018 IEEE International Conference on Biomedical and Health Informatics

Integrative informatics for precision and preventive medicine

4-7 March 2018

Las Vegas, NV - USA

Call for Papers

The IEEE International Conference on Biomedical and Health Informatics (BHI) is the flagship conference of IEEE Engineering in Medicine and Biology Society (IEEE-EMBS) on the topics of informatics and computing in healthcare and life sciences. The theme of the BHI2018 is "***Integrative informatics for precision and preventive medicine.***"

IEEE BHI2018 will be co-localized with HIMSS2018 (2018 Health Information Management Systems Society Annual Conference) and IEEE BSN2018 (2018 IEEE Body Sensor Network) in Las Vegas, during March 4-7, 2018. It will provide a unique forum to showcase enabling technologies of devices and sensors, databases, systems, signals, and big data analytics that optimize the acquisition, transmission, processing, monitoring, storage, retrieval, analysis, visualization and interpretation of vast volumes multi-modality biomedical and related social, behavior, environmental, and geographical data. It will also demonstrate the deployment of BHI informatics solutions that integrate several technologies including machine learning, artificial intelligence, Internet of Things (IoT), mHealth, e-Health, human computer interface, telemedicine, bioinformatics, sensors, imaging, and public health monitoring, to achieve patient-centric, outcome-driven health care. BHI2018 has the following five tracks: **Bioinformatics; Imaging Informatics; Sensor Informatics; Clinical Informatics; and Public Health Informatics.**

BHI2018 will provide dedicated networking social events and special topics workshops to encourage BHI 2018 participants to exchange knowledge and insights, and to cultivate collaborations.
