

Sections Congress 2008 – The Launch Pad to Tomorrow

The Transformation to the New Paradigm for Member

The member is IEEE...

Engage the member throughout every stage of their life cycle

Grow and develop the member

The professional home for the member

How the section fits in IEEE achieving the strategic direction ...

“To foster technological innovation and excellence for the benefit of humanity.”

The member is the engine and vehicle for achieving the direction and delivering the technology based solutions for the benefit of humanity.

The output is an engaged, skilled, committed member that will apply technology for their benefit, the profession and the common good.

The Section is one of the final mechanisms that engage, grow and develop the member.

What are the barriers that need to be removed for sections to grow and develop members?

Engage, grow and develop the leaders... leadership training ... leaders actions

Help new and existing members find their professional home in IEEE

Help students to become more involved in sections

Identify pre college students that have the talent and mindset for math science and / or engineering

What information about the member, the leader, the pre college student, the parents, etc is needed to help the engagement, growth and development of the individual throughout the stages of their life.

The list goes on. How do we engage each other to achieve the direction of IEEE?
