

*WINSTON-SALEM SECTION REPORT
FOR REGION III FALL MEETING OF
2010*

The WS Section is a small section. We just recently mailed our fall newsletter to 175 members. Our spring newsletter went to 164.

At the end of 2010, we will have held ten technical meetings, thanks to our active and energetic Vice-Chairman, Bill Williams. Our attendance is 25-40 per meeting. Mr. Williams will be representing our Section at the fall meeting and will serve as our Employment Coordinator.

We have a very active EMBS Student Group, which is a part of the Wake Forest University-Virginia Tech Medical Biological Engineering Graduate School. The group won the 2010 EMBS International Performance Award and it was presented at the IEEE EMBS annual meeting in Buenos Aires in September. We are justifiably very proud of this group and their award.

During the summer we did an email survey of our members for unemployment and underemployment and received two responses of unemployment. We post known openings in the area on our website.

Our emphases for the coming year of 2011 will be communications with our membership, developing and presenting some section awards, and promoting volunteerism among our members.
