Due to travel and work demands, the support plan is behind schedule.

I would like to advance that plan by asking all of you on the EXCOM to help me in developing the Region 3 Support Tack Force. The idea is to identify experienced and active IEEE volunteers in each area of the region that can act as local support persons when sections have a problem in operations, reporting, meeting programs, and scheduling, etc. These local members of the task force would be asked to act as information gatherers, as well as resource persons for the local leadership. The tack force as a whole would be tasked as a committee to offer suggested solutions, good speakers, and leadership development ideas as needed.

Please email me if you can volunteer to work with this committee or if you have information of a section that needs our support.

Respectfully submitted,
Butch Shadwell
