Winston-Salem section report.

Chase, I will try the WebEx again tomorrow evening from my home computer as our section is smallest in R3 (< 110 members) and does not have even an office let alone IT personnel, compatible computers, etc. We do keep the L-31 and L-50 reports up to date but do not have personnel to respond to all the requests for information. Many requests seem to be very redundant.

I have gone through the L-31 meeting reports and found five not previously reported. I counted 10 technical and 4 professional. We have had several section ex-com luncheon meetings that I didn't bother to list. I would bet that we are more active per member than any other section.

Additionally, our student clubs are active. The Wake Forest University EMBS chapter held approximately 50 combined professional, technical and networking events this past year. The Forsyth Technical Community College IEEE club has restarted 3-D printer activities.

Listing of Winston-Salem section meetings for 2017.

Section plans for 2018 include:

1. Update and maintain the section website.
2. Find more volunteer officers and appointees.
3. Promote and celebrate Engineering Week in February and IEEE day in October
4. Possibly, involve student clubs to support local STEM classes with the assembly and operation of low-cost NET-A8 3-D printers.
5. Continue support of WIE activity.

Cheers from beautiful Winston-Salem.
