

Director's Report to the IEEE Region 3 ExCom
March 17, 2019

(1) IEEE DataPort <<https://ieee-dataport.org/contact>>

IEEE MGA and IEEE TA are working together to ensure all IEEE members are aware of a valuable new data platform developed and implemented by IEEE called IEEE DataPort. IEEE DataPort supports the researcher's growing data needs and all regional members can currently utilize the platform at no cost to store data, share data, access datasets, manage data, and initiate/manage data challenges.

IEEE DataPort has many features that make it much more than a simple data repository. It can support research reproducibility, assist in performing new and extended research, provide datasets and services for student design competitions, and share data analytics to link among IEEE members and non-members working in similar fields, building data communities.
