Dear Region 3 Executive Committee Members:

- Issues requiring action by the Region 3 Committee or ExCom
    Currently we do not have an issues requiring action from the Region 3 at this time.

- Successes/Opportunities for Engaging the member, volunteer, non-member, public
    We delayed our PACE activity due to loss of our PACE chair and are striving to gain interest in the leadership areas. Time is always a challenge for section volunteer activities. Our Senior Member drives were successful and we are planning to sponsor or initiate a Smart Village Project. Historically we have had Young Professional socials and a family picnic, but due to lack of volunteers, the past couple of years we have held only one social event. We have a website that we maintain but use no social media platforms.

- Notable section activities (positive and negative)
    We have quarterly meeting covering various topics. Our popular topics last year were Surge Protective devices and NFPA 70E 2018/OSHA Standards. We have also planned IAS meetings in conjunction with our section. One of these was PLC Safety Integration. We have the topics practical to members work and not a "sales pitch." Historically, Data Centers, Sustainability and the NEC Code workshops pull the most attendance. Our standard and best attended meeting times are 9:00 a.m. to 1:00 p.m. and include breakfast and lunch.
