

IEEE R3-AREA 3 Report for September 19, 2022 EXCOM Mtg

- **Issues requiring action by the Region 3 Committee or ExCom**
 - None
- **Success/Opportunities for Engaging the Member, Volunteer, Non-Member, Public**
 - I continue communicating with the sections and leadership in my Area and getting to know the leadership and key contacts. I am making plans to meet with each Section Chair and members personally as soon as possible. I am also concentrating on the sections that do not participate in the Florida Council meetings as I believe this is very beneficial to all
 - I will continue to work on Area 2 and 5 Chairs to participate in the next Florida Council meeting so that we can coordinate our strategies for all Florida Sections. I have sent them the minutes from the last two meetings and will be inviting them to the next meeting, currently planned for December 2022
 - My preliminary action items for Area 3 Sections include:
 - Define what it will take to get non participating or sluggish sections to come up to speed and get super active
 - Work together as Sections to maximize our member reach, interests, training/activities/presentations and retention
 - Define the kind of activities that we can concentrate on so that we can enjoy working closely with each other as Sections for maximum IEEE overall benefit
- **Notable AREA activities (Positive and Negative)**
 - I attended the Florida West Coast Section – STUDENT INTRODUCTION TO ENERGY at St. Petersburg College in Clearwater, Florida. The students received hands on information on power generation, transmission and distribution among other pertinent info. An article was submitted for the upcoming R3 Newsletter:
