

Section Support Committee

January 2024

The Section Support Committee will be working hard on three main goals this year:

1. Support sections through training that is identified through surveys of our volunteers
2. Help student chapters connect with their Sections and vice versa
3. Offer micro-volunteering opportunities for senior members elevated in 2023 by starting a series of panel sessions on technical topics in the common fields of interest within our Region

The Projects committee, under the leadership of Allen Jones, will be presenting this year's themes and deadlines to the ExCom. Please see Allen's linked presentation on the agenda page.
