

IEEE Signal Processing Society Procedure  
Workshop & Conference Proceedings for IEEE Book Broker  
*Effective 18-May-2002*

**PROCEDURE**

The CD-ROM conference proceedings must contains the following items:

- |                      |                     |
|----------------------|---------------------|
| 1. Front Cover       | 5. Technical papers |
| 2. Title page        | 6. Author Index     |
| 3. Copyright page    | 7. Back Cover       |
| 4. Table of contents |                     |

These will be sent to IEEE Xplore as a unit in pdf form.

All files on the CD-ROM MUST be full text, searchable PDF files.

(see document:

[“Requirements for Creating PDF Documents for IEEE Xplore, Version 3.1, 6 August 2003”](#))

**Numbering**

The technical papers should be paginated in consecutive Arabic numbers; typically the first paper begins with Arabic number 1. Odd numbered pages should be on the right side and even numbered pages on the left. The numbering may also begin with the title page as page number 1 and consecutively numbered after that even if the page number is not printed on some pages. Alternatively the items that make up the front matter of the proceedings (Title page, Copyright page, Table of Contents, etc.) may be numbered in lower case Roman numerals. Page numbers should be centered at the bottom of the page below the text. A Copyright Clearance Center Code must appear on the bottom first page of each paper. This code will be supplied in the Letter of Acquisition (LoA) that is sent to the Conference Organizer by the Acquisitions Administrator of the IEEE Technical Activities Department.

**Front Cover**

The cover must contain the proper title of the Conference Proceedings as provided by the IEEE in the Letter of Acquisition. The design of the cover should present the title before any other text. It should be clear, easily readable, and not confused with other typography or design. The front cover may contain such additional information as the conference or event name, location, dates, sponsors, themes, logos, and editors.

**Title Page**

The title page is always defined as the first right-hand page after the cover. It is similar but usually simpler in design than the cover. It must contain the proper title of the Conference Proceedings as provided by the IEEE in the Letter of Acquisition before any other text. The title page may additionally contain such information as the conference or event name, location, dates, sponsors, themes, logos, and editors.

## **Copyright Page**

The copyright page follows the title page and is always defined as the first left-hand page. It must contain the following information obtained from the Letter of Acquisition

Title

**Copyright and Reprint Permission:** Abstracting is permitted with credit to the source. Libraries are permitted to photocopy beyond the limit of U.S. copyright law, for private use of patrons, those articles in this volume that carry a code at the bottom of the first page, provided that the per-copy fee indicated in the code is paid through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. For other copying, reprint, or reproduction permission, write to IEEE Copyrights Manager, IEEE Operations Center, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08855-1331. All rights reserved. Copyright © 2002 by the Institute of Electrical and Electronics Engineers, Inc.

Library of Congress Number

Information about how to order the publication.

IEEE Book Broker does not purchase CD-ROM copies of proceedings. Nevertheless, the CD-ROM packaging must contain the ISBN number provided by IEEE. Please contact Betsy Toland for this information when you are ready to prepare your CD-ROM. ICASSP and ICIP conferences should continue to contact Pat Thompson ([p.thompson@ieee.org](mailto:p.thompson@ieee.org)).

## **Table of Contents**

The table of contents lists the technical paper titles, author names, and page numbers of those items in the proceedings. It may also include listings from any non-technical pages in the conference, such as, session titles, technical content areas, print volume breakdown, author affiliations, as well as other items contained before or after the technical content which is also called the front matter or back matter, respectively.

## **Sample Front Matter**

Items that may appear in the beginning pages of a conference proceedings may include the following: preface, introduction, editorial, committees, sponsors, dedication, etc.

## **Breaker Pages (optional)**

A breaker page is a right-hand page inserted to separate sessions or technical content. Typically there is heading text listing the session or content that follows. The next left-hand page may or may not be blank. The breaker pages are included in the pagination sequence, although they typically do not carry page numbers.

**Author Index**

The author index is an alphabetical listing, by family name, of all the authors of the technical papers along with the starting page number(s) of their paper(s). This index appears at the back of each volume, but carries folios only in the final volume when it continues the pagination sequence of the item immediately preceding it.

**Sample Back Matter**

Items that may appear at the end of a conference proceedings may include subject index, call for papers of a future conference, conference attendee list, photographs of the conference highlights, etc.

**Back Cover**

Usually the back cover is blank or does not contain information. When it does contain information this should be sent to Xplore, otherwise it may be omitted.

**Additional Information**

Thus far we have dealt with the very basic or minimum parts that make up a conference proceedings. There are many other optional areas, please refer to the area listing "Pubtypes." Most often these items appear before the technical papers: this general area is known as the front matter. Items may appear after the technical papers usually after the final author index: this general area is known as back matter. Technical papers may be known by a number of different naming conventions such as Poster Paper, Invited Paper, Keynote Address, Tutorial, etc.
