Assessment Guidelines

Project Title: _____

Competitor(s): _____

Assessment Guidelines*

Criteria Description	Weight	Mark and Comments
Objectives Were they clearly stated? Were they appropriate Were they met?	/ 25%	
Presentation Structure of the talk. Delivery, audibility, conviction. Did the visual aids help or hinder? Rate of information appropriate?	/ 25%	
Topic Technical content. Analysis. Originality: Is this the speakers own project/contribution?	/ 15%	
Question Period	/ 10%	
General Impressions	/ 25%	
Total	/100%	

* Based on the Guidelines or previous years for the IEEE student paper competition

2011 IEEE Eastern Ontario Student Oral Papers Competition

Competition Rules and Guidelines

Presentations:

1. The competition is open to students of universities and technical colleges in the Ottawa and Kingston areas, who have not completed the final academic year of their undergraduate programme
2. Topics of presentations must be of interest to the Electrical/Computer/Software engineering or Computer Science fields of study
3. The level of the presentation is to be aimed at level of the contestants peers
4. The work will be judged on a presentation, with conventional visual aids given to an audience of the speaker's peers. (All Members of the IEEE and their guests are also welcome.)
5. The duration of the talk is not to exceed 15 minutes followed by a 5 minute question period.

Judging:

1. The presentations will be judged by a panel of 3 to 5 respected members of the Electrical/Computer/Software Engineering and Computer Science profession, who will present their findings immediately following the conclusion of the final presentation.
2. The Judging will be based primarily on presentation, then content, and finally originality of the topic.
3. The speaker(s) must present his/her own work. This can include the work of a team of which the speaker is a member, or a subject the speaker has researched.
4. The speaker must design the presentation themselves, although help from teachers is acceptable. If professional help is used in the preparation of the presentation, the speaker must clearly state this to the judges.
5. For fairness in comparing student who work on a tight budget, and those with larger budgets, it is necessary for each speaker to clearly state: (a) the financial support for the project (b) technology available to the team (c) direct technical support received and (d) the role of the team in the accomplishments presented.
6. Demonstrations should be prepared by the speaker(s). Help from others must be acknowledged.

N.B. These guidelines are based on the assumption that the presentations are aimed at the competitor's peers.

** Based on the Guidelines or previous years for the IEEE student paper competition
