

IEEE-IAS CHICAGO CHAPTER FEBRUARY TECHNICAL SEMINAR 2008 2008 NEC® CHANGES

February 23, 2008, 7:30 am to 4:00 pm
Midwest Conference Center 401 West Lake Street, Northlake, Illinois 60164

Presenter: The seminar will be taught by a regular member of the National Fire Protection Agency (NFPA) or International Association of Electrical Inspectors (IAEI)_Professional Development Staff.

Description: The 2008 National Electric Code (NEC) Analysis of Changes seminar helps electrical designers, engineers, trainers, installers, and inspectors understand first-time NEC articles, usability improvements, and key changes and how they affect commercial and industrial work.

The 8-hour seminar is delivered using the 2008 NEC and the 2008 Analysis of Changes created by the IAEI and NFPA. The Analysis of Changes combined with the NEC provides an accurate and authoritative account of the significant revisions in the 2008 NEC. For all of the nearly 400 major Code changes covered, you'll have excerpts of actual 2008 NEC text along with an in-depth analysis of the change and its impact on the field. You'll also learn why the change was initiated and accepted, including technical substantiation.

Each On-Site Seminar participant receives:

- 2008 IAEI Analysis of Changes
- NEC tabs
- 2008 NEC®
- Calculator
- Canvas briefcase
- A Certificate of Attendance
- Accredited (IACET) Continuing Education Units (0.7)
