

## **Call for Nomination for 2009**

# **Richard Harold Kaufmann Award**

The Richard Harold Kaufmann Award Committee calls for nomination for the 2009 Richard Harold Kaufmann Award. The Richard Harold Kaufmann Award is an institute-level award sponsored by IEEE Industry Applications Society. The people who are qualified by their exceptional contributions in the fields specified herewith be stimulated to nominate for the 2009 Richard Harold Kaufmann Award. The deadline for the nomination is January 31, 2008.

The following criteria are considered in the technical fields: exceptional contributions to design or application of systems technology, application of systems technology, apparatus, devices or materials for plant power distribution, drive systems, process control or other utilization systems, and the quality of the nomination. In the selection, contributions related to the industrial systems are important.

In the evaluation process, the following criteria are considered; education, technical recognition including publications, patents, awards, and standard activities; engineering carrier achievement including administrative and professional carrier success, and technical achievement; and endorsements. The technical achievement includes IEEE membership. The IEEE Fellows will be highly evaluated.

Chair: Hiroaki Ikeda
