

Medtronic Career Opportunities

At [Medtronic](#), we're committed to *Innovating for life* by pushing the boundaries of medical technology and changing the way the world treats chronic disease. To do that, we're thinking beyond products and beyond the status quo - to continually find more ways to help people live better, longer.

Imagine playing a role in changing what it means to live with chronic disease. At Medtronic, you can. We're creating technologies that treat chronic disease in new ways so people can live better, longer. We didn't become a global leader by sitting on the sidelines. Our vision requires bold leaders. If you want a career that is challenging, energizing, and rewarding, we hope you'll consider joining us as we push the boundaries of medical technology.

We are currently looking for a **Sr. Program Manager – Intraoperative Imaging** in our Boston location. For more information please click on the link to our [careers page](#) at jobs.medtronic.com. A brief synopsis of the role is:

A Sr Program Manager leads and directs the activities of one or more large programs, functional areas, or long term projects with responsibility for results in terms of costs, methods, and outcomes. This involves multiple, high-priority projects to deliver new products, services, and/or other significant business assets. A Sr Program Manager is comfortable dealing with ambiguity and is confident in applying business acumen to make pragmatic trade-off decisions between time-to-market, product costs, product reliability, product features, and budget. This position requires highly developed communication and collaboration skills and experience commercializing and maintaining medical devices. This position will include direct management of project managers in support of program goals and objectives.

Qualifications:

EDUCATION AND EXPERIENCE REQUIRED

- B.S./B.A. in Engineering or similar related field.
- 10+ Years of experience in Program Management.
- 2+ Years of experience managing people.
- Certification as a Project Management Professional (PMP)

SPECIALIZED KNOWLEDGE REQUIRED

- Considered expert in the medical technology industry with experience developing and commercializing medical device products.
- Experience developing products in medical imaging and for spine/orthopedics surgery.
- Ideation, development, and release of large electro-mechanical capital product.
- Management knowledge of software development processes.
- Proven track record of leading cross functional product development and introduction teams to deliver product on time and within budget.
- Extensive knowledge of worldwide regulatory standards that apply to our products.
- Knowledge in capital equipment manufacturing processes as they apply to the design process.

Medtronic was founded in 1949 as a medical equipment repair company by Earl Bakken and his brother-in-law, Palmer Hermundsli. Today, we're the world's largest independent medical technology company. We employ 46,000 people worldwide - serving physicians, clinicians, and patients in more than 140 countries.
