

TECHNICAL TALK

Professional Issues of International Engineering Practice

By:

Professor Muhammad H. Rashid, Fellow IEEE
Professor of Electrical and Computer Engineering, University of Florida

Date: 26th June 2008

Time: 3.00pm

Venue: Main Meeting Room, Level 2, College of Engineering, UNITEN

Synopsis

As many countries are joining the Washington Accord for international collaboration for manpower movement and engineering outsourcing, engineers are facing new challenges and non-engineering issues in the host country. The presentation discussed some of these issues and challenges.

A total of 30 participants attended the talk, of which 14 are IEEE members. The participants were engaged in a lively discussion on the topic.

Prof Rashid meeting Prof Zamri (UNITEN) and M. Zain (IEEE PES)
