PERC's review classes are designed to fully prepare you to pass the FE and PE exams. Our courses teach problem solving methods, strategy and follow a strict adherence to NCEES exam specs.

All classes are taught by Professional Engineers who are practitioners in their fields. Enough theory is presented for background, and the focus is on problem solving.

PERC will be using The Lindeburg & Camara Review Manuals

PERC will provide the Michael Lindeburg, PE Manual, Problem/Solution book, and the Practice Problems book for the exam you are going to take from PPI Publications.

The Fundamentals of Engineering exam is 100% multiple choice and covers 12 major subjects. It is about what you learned during your first 2 years of college.

It is a limited reference exam where you use the NCEES Reference Handbook, 8th Edition 2nd revision and no other references. Please get a copy prior to the FE Strategy Class. You can purchase or download a copy from ncees.org. There is also a specific list of approved calculators. More information will be provided on these topics on Strategy night.

The AM session is specified and there is no choice of subject matter. In the PM session you may choose between the general exam, which is PERC’s recommendation, or a disciplined exam. We will discuss more on this in the Strategy session.

Strategy Sessions

We will strategize a plan to pass the exam, and discuss common mistakes. This is important; please do not miss this class!

About the PE Exams

The PE exam covers the knowledge you gained during your last 2 years of college.

The PE exams in Civil and Mechanical Engineering follow the all multiple choice, breadth/depth format of the past.

PERC will offer classes for the Power Exam only. More information will be provided on Strategy night.

The Year 2012 marks 38 years of service to the Engineering Profession by PERC.
