

## Power Quality Lecture

**Rao Thallam** (M '75, SM '80, F '02) is a Senior Principal Engineer with Salt River Project (SRP), which is a public water and power utility serving central Arizona. He worked for the General Electric Company for ten years prior to joining SRP in 1985. He has published 60 papers in HVDC transmission, harmonics, power quality, and surge arresters. He wrote chapters in two books, *Electrical Engineering Handbook* and *Electric Power Engineering Handbook*, both published by CRC Press. Dr. Thallam received a US patent in 1982 and the IEEE Standards Board medallion for “outstanding achievement through standards” in 1996. He is Chairman of the IEEE Phoenix Section in 2006.
