

ISPCE 2017

2017 IEEE Symposium on Product Compliance Engineering

Holiday Inn San Jose - Silicon Valley

MAY 8 - 10

The Value of this Symposium

The IEEE PSES Symposium provides attendees an interactive experience on the latest advancements of product safety engineering. Through multi-disciplinary presentations and cross-functional dialogue, first time attendees and veteran attendees can take away the tools necessary to meet today's challenges. Both IEEE members and non-IEEE members are welcome to attend.

Who Should Attend

The symposium is a forum for exchanging ideas, practical experiences, work experiences and business cards. The targeted audiences include but not limited to people involved with safety engineering in these areas of interest:

- Inherently safer products and equipment
- Product Safety services
- Training and continuing education
- Regulations and standards
- Risk management
- Workplace product safety
- System and Software safety
- Human factors

Who Will Benefit

The people who would most benefit in attending the symposium are, but not limited to:

- Technicians
- Engineers
- Certified Technicians & Engineers
- Consultants
- Educators
- Administrative Personnel
- Local, State, & Federal regulators
- National standards committee members
- International standards committee members

For additional information and the for the very latest details about the symposium, please visit our symposium website.

The symposium will address safety engineering for equipment and devices. It will allow engineers, students, and others with an interest in electrical product safety to discuss and disseminate technical information and enhance professional skills.

Talk and discuss problems with vendors displaying the latest regulatory compliance products.

Attend Technical Sessions specifically targeted to the electrical safety engineering professional.
