

S&C ELECTRIC COMPANY
Excellence Through Innovation

Tour S&C Electric Company's Advanced Technology Center

May 17, 2011

5:30pm—7:30pm

We invite you to tour S&C's world class manufacturing facility, including manufacture, assembly and testing of Substation Circuit Switchers.

Then journey into North America's largest short circuit laboratory in our Advanced Technology Center; including a demonstration of the Smart Grid's hottest and smartest device—the IntelliRupter® Pulse Closer. Our

Advanced Technology Center is a LEED Gold building and S&C has been certified to ISO 14001.

Enjoy an overview of various transmission and distribution class products developed by S&C in our 100 year history. Industry experts will be available for demos and questions.

Also enjoy cocktails and hors d'oeuvres while socializing with S&C personnel.

No need to worry about transportation between the hotel and our industrial campus as transportation will be provided. Please consider wearing comfortable shoes as your tour could include much of our 46 acre Chicago campus.
