

A Northwest Night at the World Forestry Center – Discovery Museum

Enjoy a relaxed evening at a unique venue, a taste of the freshest local products and ingredients as catered by one of Portland's finest caterers, and drinking local microbrew beers, wines and distillery products. Tonight's event gives IEEE PES Substations exclusive access to the World Forestry Center Discovery Museum.

Located in Portland's beautiful Washington Park, this 20,000 square foot museum is sure to delight. Visitors will be both educated and entertained as they learn about the importance of forests and trees in our lives, as well as environmental sustainability.

Built in dramatic Cascadian style architecture, the stunning Discovery Museum has been a Portland icon since 1971. Visitors can take a wet-free raft ride, see the forest from a bird's-eye-view, learn about different people who work in the forest, and "travel" to Russia, China, South Africa and Brazil to discover how those regions are utilizing their forests and the challenges they face.

The first floor of the museum focuses on forests of the Pacific Northwest and the role they play in providing habitat, water, recreation, wood, and a multitude of other benefits. The Forest Store also provides guests with unique gift and souvenir options, many made in Oregon. The second floor of the museum explores forests around the world and their connections to people.

Motorcoach transfers will be provided to and from the event.
