WELCOME REMARKS TO IJCNN'93-NAGOYA

Welcome to the International Joint Conference on Neural Networks (IJCNN'93-NAGOYA). It is our great pleasure to have an opportunity to host the IJCNN'93-NAGOYA, the largest and the first conference in Japan in the area of the Neural Networks cosponsored by all the major neural networks societies and councils in the world.

Nagoya and its surroundings have many electro-mechanical industries. The area, as one of the industrial technology centers of the world, has been involved in the research and development of innovative technologies and has applied them to actual products. We believe that the neural networks technology is one of the key technologies bringing us a prosperous future.

Recent development of Neural Networks technology, together with the results from the Fuzzy Logic and the Genetic Algorithms, has emerged a new paradigm that enables flexible and efficient information processing. This conference aims to give an opportunity to the leading researchers spread among various fields for discussing the perspectives and the future trend of the field.

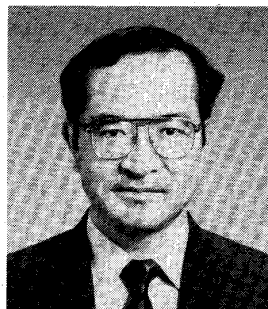

The technical sessions including the round table discussion and the special session on "Real World Computing Program," contain the recent important results in both theoretical and application research in the field. You surely enjoy the sessions and discussions.

We would like to thank the members of our committees, who have done excellent jobs for this conference. We do hope that this conference will be very successful and fruitful to all of you and will contribute to the development of this emerging technology.
