

What advice would you give to a new IEEE Member as the best way to get started and get involved with IEEE membership?

Find your closest Member

Attend IEEE general meeting!

There is always responsibilities for everyone in IEEE. Take part in the actives so that getting much more from IEEE. With this way you can contribute to the IEEE in a remarkable way and feel the belonging of being a part of IEEE.

Communicate with peers, keep visiting the ieee website and read and understand the publications in the area of interest.

A chance to become professional in your career path.

There is strength in unity, try to convince more persons to become members so that the IEEE branch would have more strength in making a greater impact with the ventures that you all pursue.

Attend local chapter and ask questions.

Become an active member of your local Section.

Attend Section meetings and join and attend local Chapter meetings for the Societies of your choice. Volunteer some time and get involved in activities. Take some time to explore myieee to be aware of the benefits of membership.

Join a job pertinent society (or recommended by a mentor), attend their conference, set in on sessions of interest and volunteer if you desire.

Take participant in the activites as more as possible,thinking about as well.

Go to a chapter meeting or conference.
