But we have got many posters related to Role of ICT during this pandemic and everyone just did their best in preparing the posters and presenting the posters everyone explained their poster and their view towards the information and communication technology being used like e-learning, online shopping, online medication, availability of pharmacy shops based on the product or item required and much more.

Some posters were digitally made and some are hand made everyone explained it very clearly with no ambiguity.

All the participants who have participated were overwhelmed connecting with the Ex-com of IEEE CS during this competition as the judges have given all the support and ideas they can and even offered their support and asked them to reach them through the website or mail. On a whole this competition was a good success with 29 active team's participation.

Some of the posters during the competition are as below:
