

UNIVERSITY OF CENTRAL FLORIDA
IEEE STUDENT BRANCH

SPONSORSHIP PACKET

FALL 2021 - SPRING 2022

UNIVERSITY OF CENTRAL FLORIDA
INSTITUTE OF ELECTRICAL AND ELECTRONICS ENGINEERS

WE ARE IEEE UCF!

OUR MISSION

The IEEE UCF family dedicates itself to advancing technology for all humanity's benefit. Our organization strives to bring our members opportunities through a focus on development in engineering, computer science, professionalism, and social service. We continuously push the boundary of what is deemed possible for student engineers.

WHERE WE HAVE BEEN...

IEEE's history at the University of Central Florida has seen the organization's transcendence into a powerhouse of engineering at the nation's largest university. The organization has achieved success through a focus on ambitious projects and workshops, growing our members across our diverse pillars, and open arms to all who wish to succeed at UCF. Last year saw one of the world's darkest times, but IEEE UCF saw its biggest year yet, growing to over 250 active members, being praised by IEEE USA for our safe and successful events, and bringing home three UCF Impact Awards!

WHAT'S TO COME!

It is time to embrace ambition! We are poised to continue our great successes into the next year, and we want you to tag along with us! Please read through the remainder of our Sponsorship Packet for what we have to offer and how you can be an integral part of our mission to bring the highest quality experiences to the next generation of stellar engineers!

Our 2020-2021 Solar Charger Team

SPONSORSHIP OVERVIEW

As the student chapter for the Institute of Electrical and Electronics Engineers at the University of Central Florida, we seek to overcome the most challenging problems in engineering in tandem with providing integral experiences to our members. To achieve our ambitious goals, we seek funding from our generous sponsors to keep the dream afloat!

IEEE UCF functions as a 501(c)(3) tax-exempt non-profit, university-affiliated organization. We rely on donations for our operations to continue at such a high level of excellence, but this relationship does not flow solely one way! We maintain a strong relationship with sponsors that allows them to leave a lasting mark on our members and access the brightest minds in academia. Through company info sessions, personalized professional and technical workshops, appearances on our content and pages, and exclusive access to our array of members, partners have an opportunity with IEEE like no other!

To entice donors further, we offer very affordable partnership plans for sponsors and other non-profits. The benefits included in these packages overflow with opportunities across all aspects of IEEE and UCF life, and are detailed in the remainder of this packet.

STUDENT ENGINEERING REDEFINED

WORKSHOPS

IEEE UCF's best-known commodity over the years has continued to be the innovative and award-winning workshops that IEEE hosts every semester. Over the next year, we plan to do a grand total of eight workshops for our members. This is a tremendous opportunity for your organization to partner with us and solidify our impact on the community and its continued growth.

RESEARCH

The avenue where industry and academia meet lies within research! IEEE UCF bolsters the efforts of our members to find solutions to questions yet to be answered, and does so with our support of research endeavors behind our project teams and individual members. We publish multiple papers and poster boards showcased around the country each year at conferences in the spirit of our endless endeavor for knowledge!

PROJECTS

Experience with projects is seen in the industry as the number one skill to have for entering into the engineering workforce, and IEEE UCF has taken this to heart. Our commitment to constantly pushing the boundary of the possible is built upon our ambition to perform at an elite level with our projects. Our ongoing endeavors include an autonomous disinfection robot, a dual-electric hybrid vehicle, robotic arms, an AI-controlled chess bot, a photonics sculpture, and many more!

TO ENGINEERING AND BEYOND!

THE IEEE UCF FAMILY

Our support of our members does not stop with our technical splendor! Our 250 members, as well as our alumni, are refined through a four-pillar mindset emphasizing social service, professional development, and community involvement on top of engineering expertise. IEEE UCF also collaborates with UCF's CECS Office of Diversity and Inclusion and numerous other student organizations to spread our involvement to include all corners of the university.

This effort allows us to include members across all majors and backgrounds, creating a diverse coalition of members who have made impacts around our community that will last years. We pride ourselves in the real change we make, and your organization has the prime opportunity to engrave an impression on the lives of our members

OUR PRESENCE WORLDWIDE!

IEEE UCF has never put boundaries on the organization's reach to those around the world with a desire to learn and achieve incredible feats. With this sentiment, we have made some tremendous strides to reach these eager engineers. By utilizing our social media platforms, website, and YouTube pages, we extend our impact to alumni, future students, and students across the nation! In an effort to grow the IEEE UCF brand, endeavors such as our Knights Open Circuit podcast, engineering video series, and the recordings of meetings and info sessions have allowed for rapid growth in popularity and hype that your team will have the privilege of partaking in!

JOINING OUR JOURNEY

Now that you know what makes IEEE UCF a special place in the realm of engineering, we ask for your support in making our ambitious dreams become a reality!

BECOME AN EKS TODAY!

There are many ways to support the efforts of IEEE UCF! Our Electrical Knights Sponsors (EKS) plan begins at a base value of \$500 and includes a wide range of benefits for broad access to all things IEEE!

In addition to our EKS plan, we also offer exclusive perks to organizations willing to donate larger sums and/or items of interest for the organization that can be used for giveaways to our loyal members or in technical workshops and projects. Plans of this nature can be negotiated with our executive team and tailored to your organization.

In conjunction with our dedication to servicing our community, we also open the door for other non-profits to join our mission in making the world a better place for all!

PARTNER BENEFITS

When you become a sponsor of IEEE UCF, you become a part of our family! Our team will integrate you into the lifestyle that courses through our members' veins! The benefits that our EKS plan brings include: Up to four personalized events, workshops, and info sessions per semester; advertising to all our members throughout our YouTube videos, GBMs, social media, and website; and exclusive access to the best future engineers in academia.

These benefits can be negotiated further, extending into the realm of exclusive advertising in some of our biggest events and projects, putting your company rightfully at the forefront of IEEE's innovation!

Your funds are in the right hands. All proceeds received go directly into student run projects and events!

We want to thank you on behalf of the IEEE UCF student branch for considering sponsoring our growing organization. Our never-ending mission to spread knowledge and technology throughout our community and the world gets one step closer to fulfillment with your help. Thank you for your time, and we hope you will join us on our journey!
